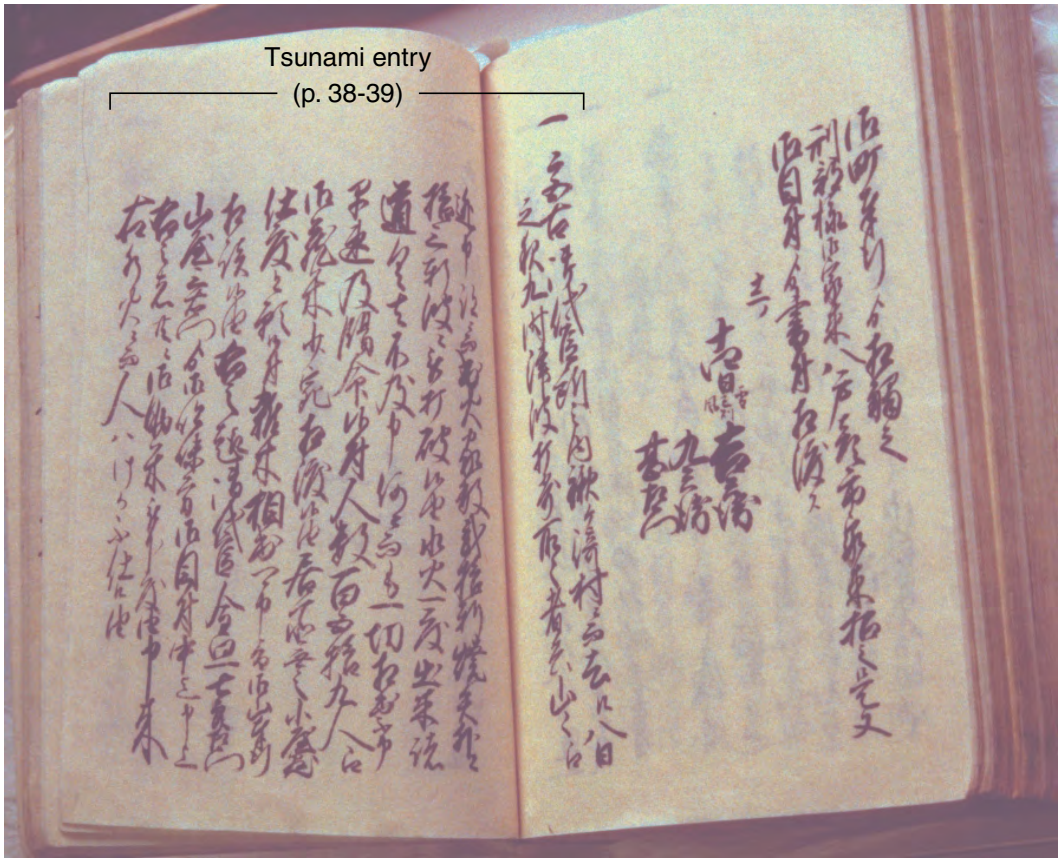
Exploring Spoken Word Data in Oral History Archives
Oxford

CLARIN?

- **C**ommon **La**nguage **R**esources and Technology **In**frastructure
- Research Infrastructure for the **humanities and social sciences**
- Provides easy and sustainable access for scholars
  - to **digital language data** (in written, spoken, video or multimodal form)
  - to **advanced tools** to discover, explore, exploit, annotate, analyse or combine them

Language resources: more than linguistics



津波
tsu harbor
nami waves
tsunami tsunami

大潮
ōshio high tide

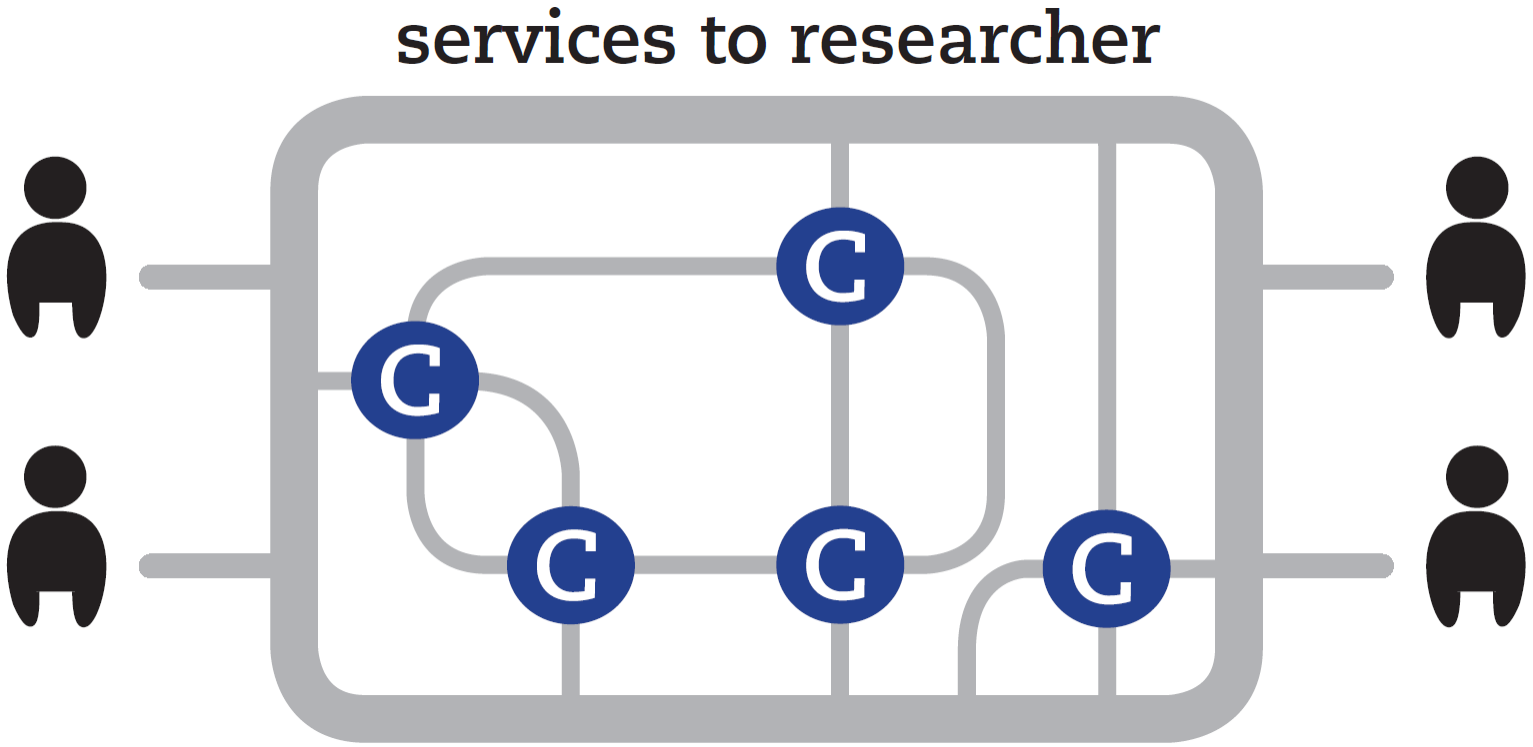
大汐
ōshio high tide
evening
water

Source:

- Atwater, B.F., Musumi-Rokkaku, S., Satake, K., Tsuji, Y., Ueda, K., and Yamaguchi, D.K., 2015, The orphan tsunami of 1700—Japanese clues to a parent earthquake in North America, 2nd ed.: Seattle, University of Washington Press, U.S. Geological Survey Professional Paper 1707, 135 p.
- doi:10.3133/pp1707

CLARIN centres

- A **distributed architecture**: (http-accessible) files, web applications and web services spread all over Europe
- Nodes in the network: **centres** (http://clarin.eu/centres)



Organisation CLARIN

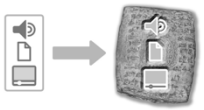
- European (ESFRI) Research Infrastructure
- ERIC since 2012
- Landmark since 2016
- **Members**:
  - Austria • Bulgaria • Czech Republic • Denmark • Dutch Language Union • Estonia • Finland • Germany • Greece • Italy • Lithuania • Netherlands • Norway • Poland • Portugal • Slovenia • Sweden • United Kingdom (observer)

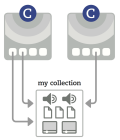
Benefits for countries

- **Access to the CLARIN Infrastructure**, i.e. to all CLARIN language resources and technology services
- **Access to expertise** via the CLARIN Knowledge Sharing Infrastructure
- **Embedding** in the humanities **research community**, with access to the same data
- **Better visibility of their language**, their research results, their resources and their **cultural heritage**
- **Opportunities**
  - for cross-lingual and -cultural **research**
  - to participate in **research projects** in which CLARIN ERIC participates as a beneficiary

The 33 CLARIN centres

Our services for researchers





- Concrete and usable services
- All available via http://clarin.eu/services
  - (+ a whole set of technical services behind the scenes)

Absolute spatial deixis and proto-toponyms in Kata Kolok

General

Name: Absolute spatial deixis and proto-toponyms in Kata Kolok

Type: extensional

Creation Date: 2014-09-26

Description: Digital references for De Vos, C. (2014). Absolute spatial deixis and proto-toponyms in Kata Kolok. NUSA: Linguistic studies of languages in and around Indonesia, 56, 3-26.

Purpose: research

Reproducibility: intended

Persistent identifier: hdl:11372/VC-1001

Keywords:
- sign language
- Kata Kolok

Creators

Person: Connie de Vos

Organisation: Max Planck Institute for Psycholinguistics

Website: http://www.mpi.nl/people/vos-connie-de

Role: Researcher

Resources

Reference	Type
Journal Article (fulltext) This paper presents an overview of spatial deictic structures in Kata Kolok, a sign language which is indigenous to a Balinese village community.	Resource
Footnote 3 - video Absolute versus absolute transpositional pointing signs	Resource
Footnote 4 - video COME-HERE-FROM-A and GO-FROM-HERE-TO-B	Resource

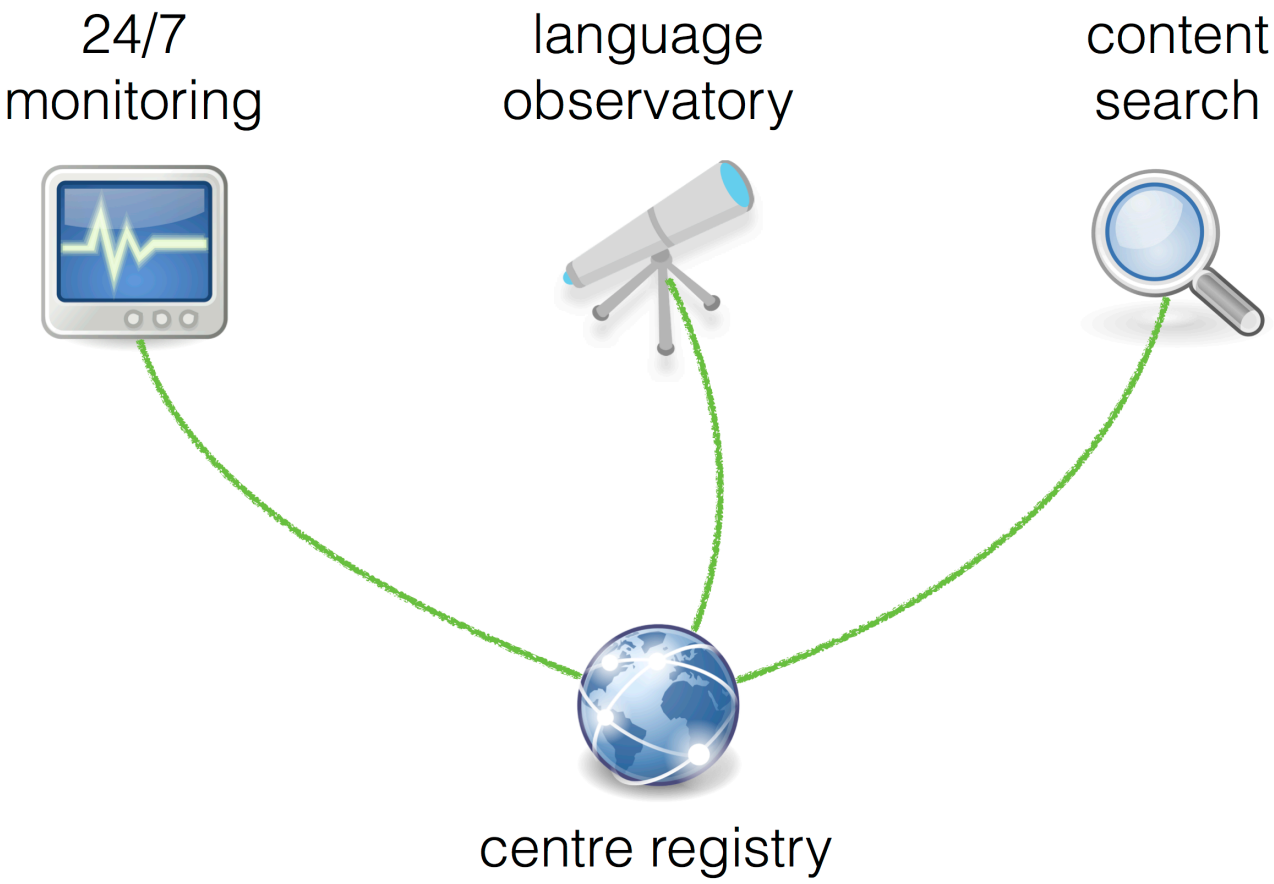
Consultancy

CLARIN technology pillars

- **Federated Identity** - letting users login to protected data and services with their own institutional username and password
- **Persistent Identifiers** - enabling sustainable citations of electronic resources
- **Sustainable repositories** - digital archives where language resources can be stored, accessed and shared
- **Flexible metadata and concept definitions** - to ensure semantic interoperability when describing language resources
- **Well-described and open protocols**, e.g.**:**
  - **Content search** - offering a search engine for a wide range of language resources
  - **Web service chaining** - giving users the possibility to freely combine language processing services

Seamless integration *within CLARIN*

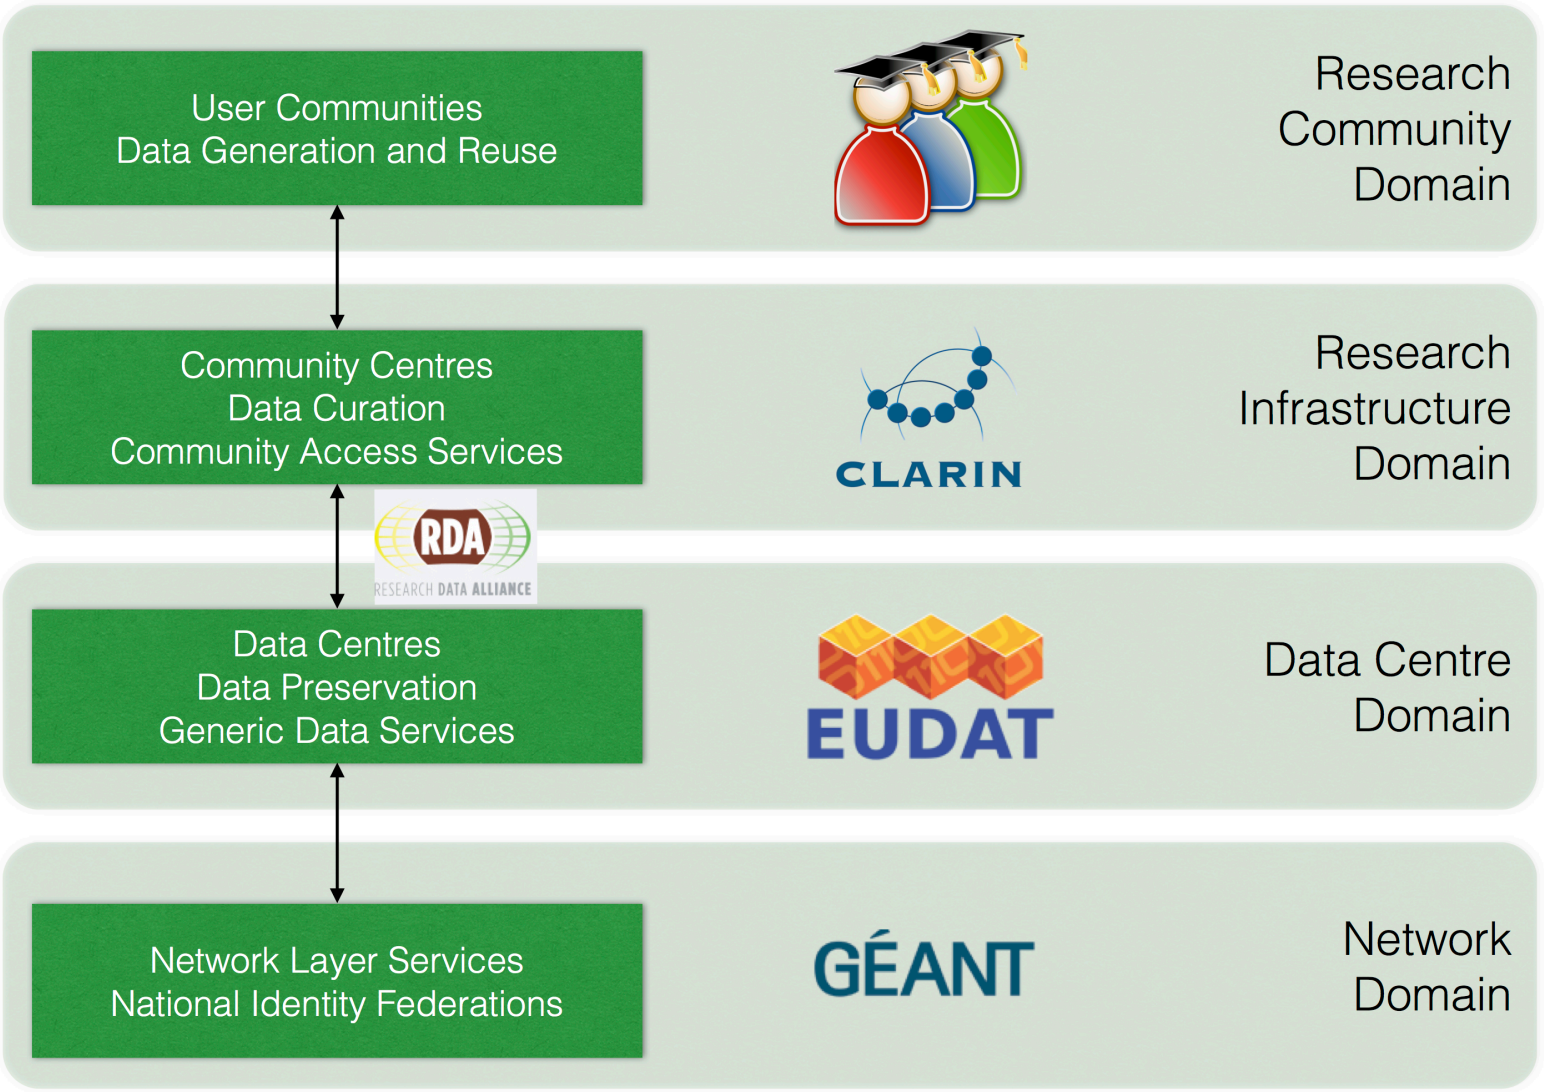
- Centres and Services are not isolated islands but part of a well-integrated setup



Seamless integration
within CLARIN

- e.g. ELAN with WebLicht (tagging) and WebMaus (phonetic alignment)
- e.g. the Language Resource Switchboard

Seamless integration
in the infrastructure landscape



CLARIN for oral history archives

- While CLARIN is based on a federation of long-term archives and services, it is not a static infrastructure
- This workshop is an excellent opportunity for us to:
  - listen to your needs
  - learn from your experiences
  - create additional bridges between the research infrastructure and potential users and data/service providers

Oral History collection database – some first feedback

- Would be nice to integrate it into the Virtual Language Observatory
  - Challenge: gathering comparable metadata from the different sources (and maintaining it!)
    - at least dublin core via OAI-PMH endpoint
    - reuse/create a specific CMDI metadata profile?
  - What to do with non-digitized resources?
    - at least provide contact information for interested parties
  - What to do with access restrictions?
    - provide at least detailed information about how to obtain access
    - suggest single-sign-on
  - Nice start at http://www.verteldverleden.org/?page_id=151
- Connect transcript search engines to the Federated Content Search?

Oral History collection database – some first feedback

- Most important: your ideas, suggestions and feedback!

Thank you for your attention!
