Field Trip – BELGRADE OUTSKIRTS: POTENTIALS AND OBSTACLES

An aerial night view of a city, likely Philadelphia, with a prominent dome structure in the foreground. The image is overlaid with a complex network of white wireframe lines that trace the outlines of buildings and streets. A series of glowing yellow lines highlights specific paths or routes through the urban landscape, starting from the left and moving towards the center and right. The overall scene is dark, with the city lights and the glowing paths providing the primary illumination.

Activate Modern Ruins!

In the search for alternatives to obsolete built environments

Dimitris Grozopoulos, Effie Kasimati and Fani Kostourou
