1 Post-editing lexicography

Three steps of utilizing corpora in lexicography (Rundell's "corpus revolutions")

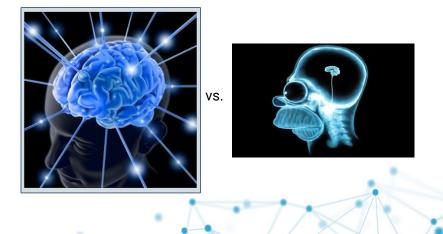

You've got nothing

sketchengine.co.uk

Step 1: Getting a corpus

sketchengine.co.uk

You have a corpus

Step 3: Automatic dictionary drafting

You have a corpus AND a dictionary draft which you post-edit

sketchengine.co.uk

- introduced too early with technology not mature enough
- pushed hard by translation agencies (cost-cutting)
- processes and methodology initially not adjusted
- ⇒ translators got furious about post-editing and it took long time until it became an established practice

therefore does not mean only automatic dictionary drafting but also

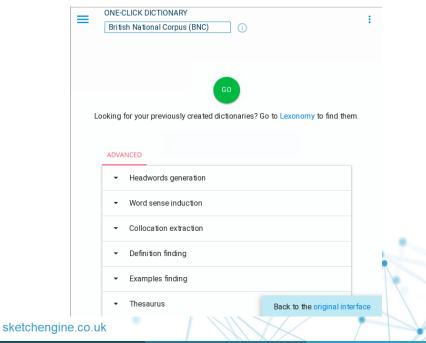

- development of tools that support efficient post-editing
- development of methodology that accounts for post-editing
- teaching and training

Sketch Engine

- corpora for 100 languages
- processing tools, analytic tools
- web platform
- SaaS + open source NoSketch Engine
- Lexonomy
 - simple & lightweight
 - web-based
 - SaaS + open source
 - designed for easy post-editing
 - interconnected with Sketch Engine (push & pull)

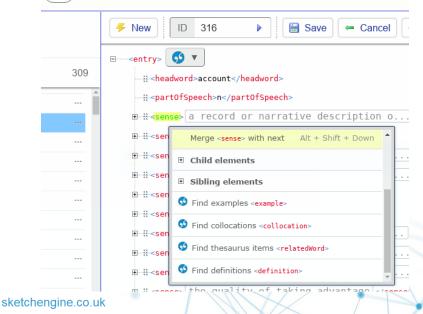

- bidirectional data transfer
- push model
 - creating automatic dictionary drafts from Sketch Engine corpora into Lexonomy
 - "One-Click Dictionary"
 - presented at eLex 2017
- pull model
 - accessing Sketch Engine corpora from existing dictionaries in Lexonomy

- headwords: wordlist
- word senses: clustering through word sketches
- collocations: word sketches
- examples: GDEX
- definitions: GDEF
- labels: word sketch highlights
- translations: bidicts from parallel corpora and/or MT

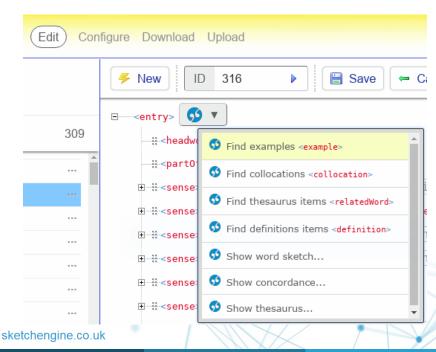

- headwords
- collocations
- word senses
- definitions
- examples
- thesaurus

Configure Download Upload

Jakubíček et al. (Lexical Computing)

Edit

- improvements of word sense clustering
- currently being tested on a Danish to English and Korean bilingual project with K Dictionaries
- improvements of definition/explanation finding
- maturing the prototype, completing its settings
- problems, bugs, requests \rightarrow support@sketchengine.co.uk

- post-editing lexicography = third corpus revolution?
- Sketch Engine & Lexonomy ready for experiments
- lot of development ahead (framed under ELEXIS)
- methodology, teaching, training extremely important
