FACULTY OF CHEMISTRY AND CHEMICAL TECHNOLOGY

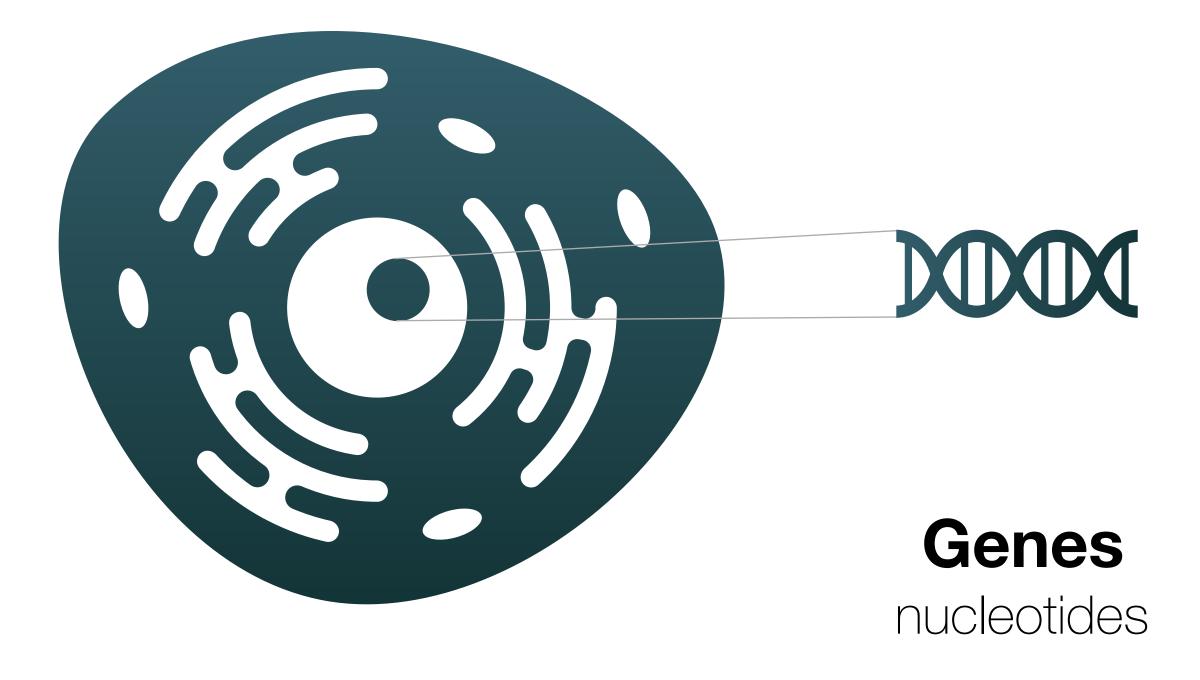

Life

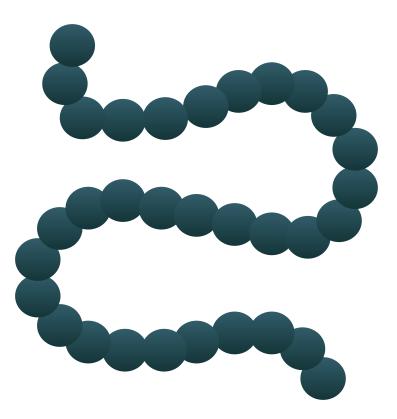

Life

the branch of science concerned with the chemical and physico-chemical processes and substances which occur within living organisms.

Central dogma of molecular biology

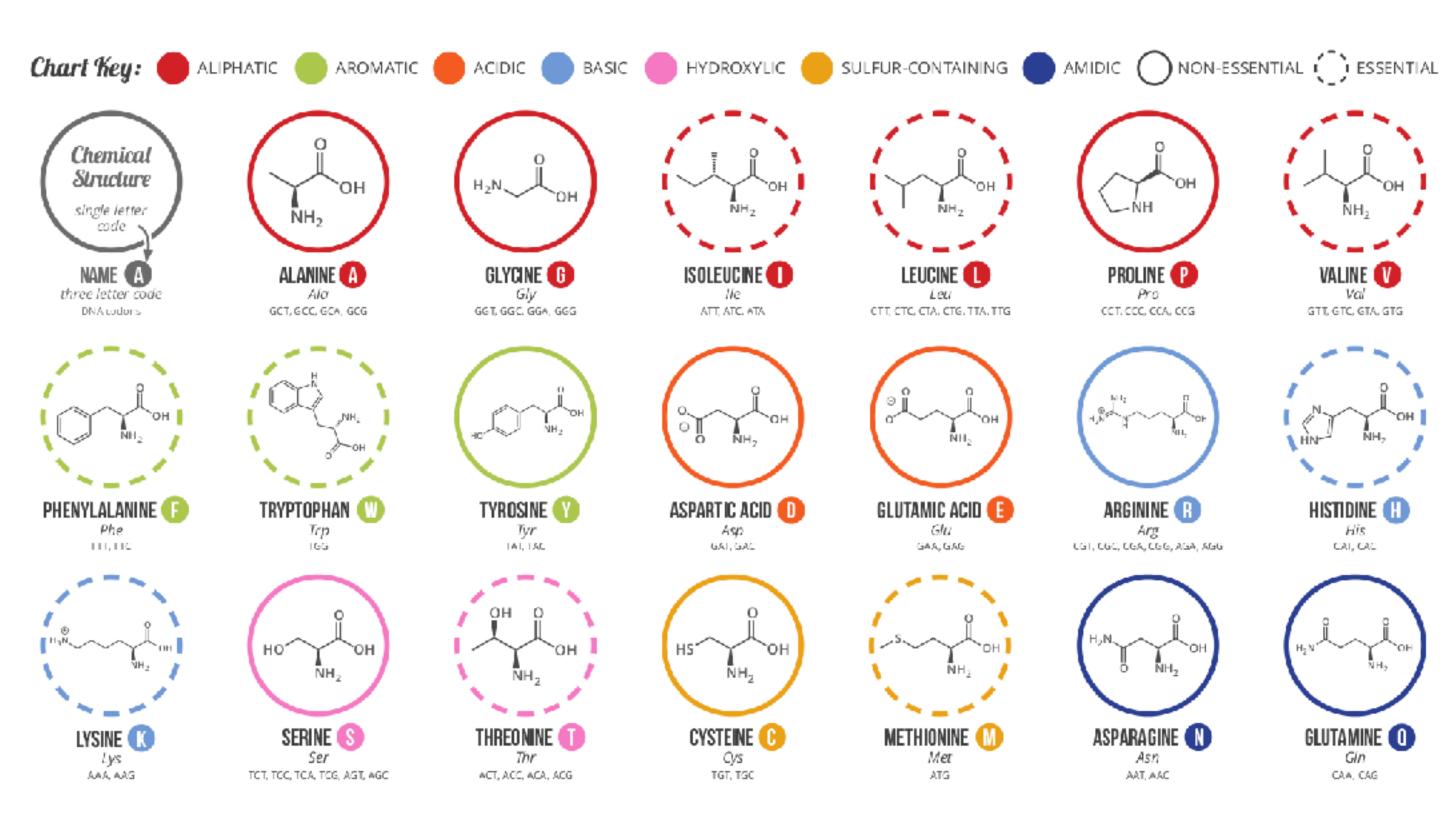

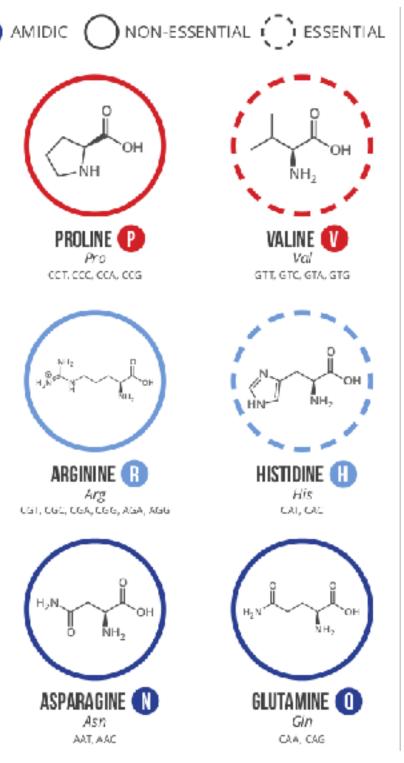

translational machinery

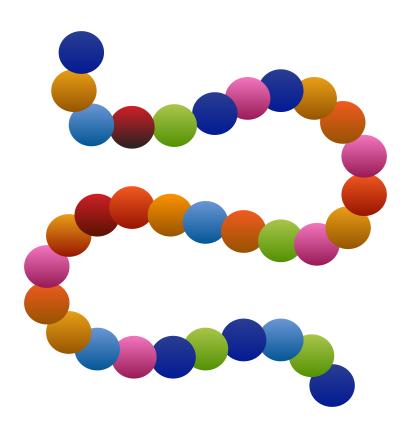

Proteins amino acids

Central dogma of molecular biology

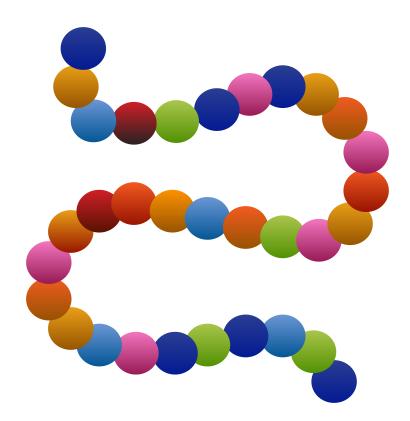

Proteins amino acids

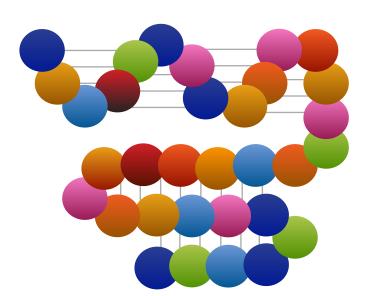

Orders of protein structures

Primary structure

sequence

Orders of protein structures

Secondary structure structural elements

a-helix

β-sheet

Orders of protein structures

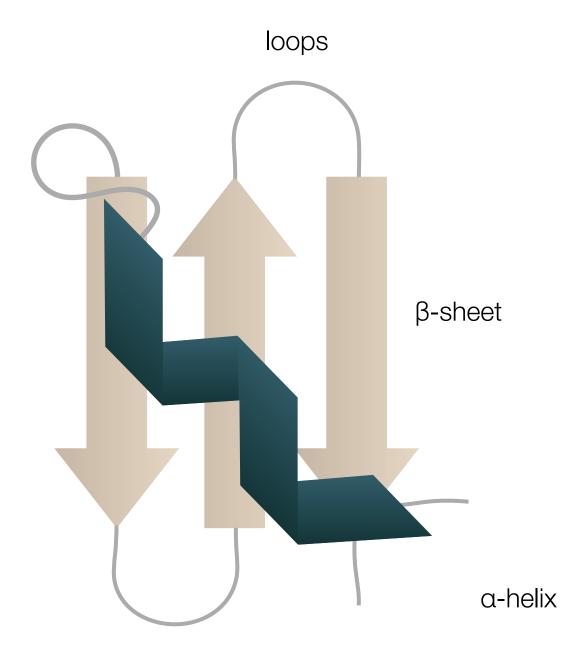

Tertiary structure

3D fold

Presentation

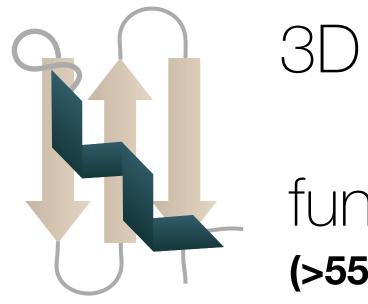

Presentation

Protein functions

Interactions

protein DNA/RNA lipids substrates

3D structure $\forall \forall$ functionality (>55% cell mass)

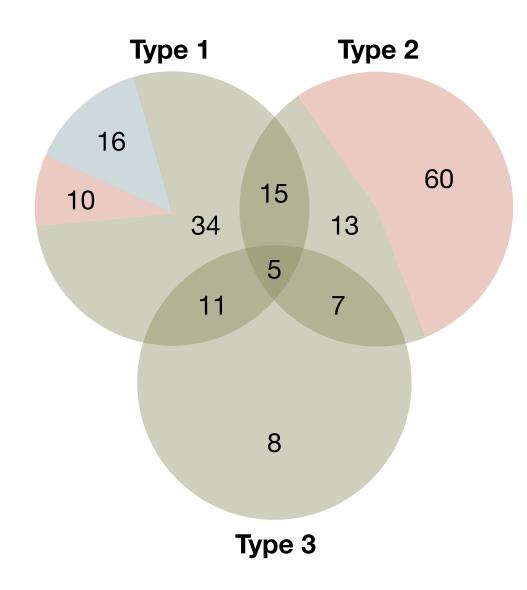

inside cells

structural role transport metabolism

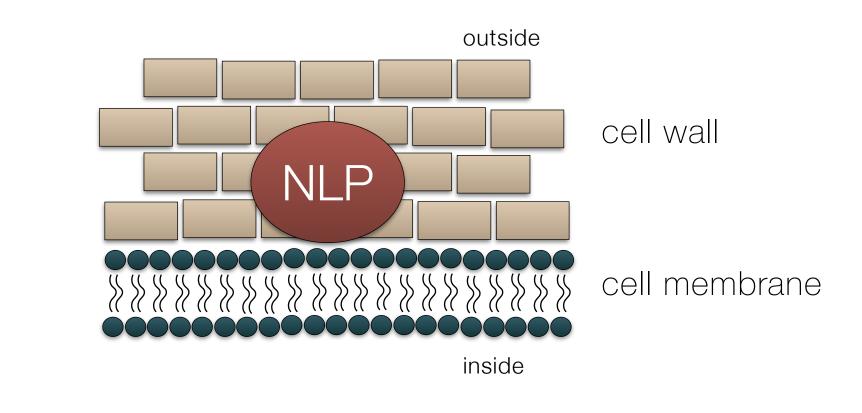

outside cells

hormons receptors antibodies toxins Primary research activity in D11

a protein family *leaf necrosis in eudicot plants* secretion plant associated microorganisms dual role activate plant immune response function predicted to form pores in target membranes

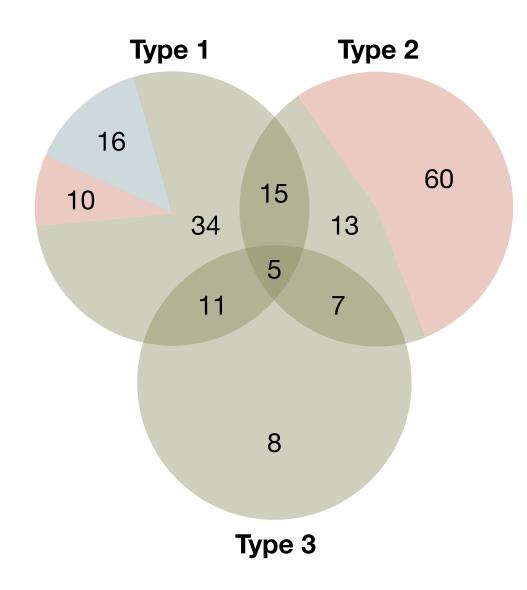

NLP toxins

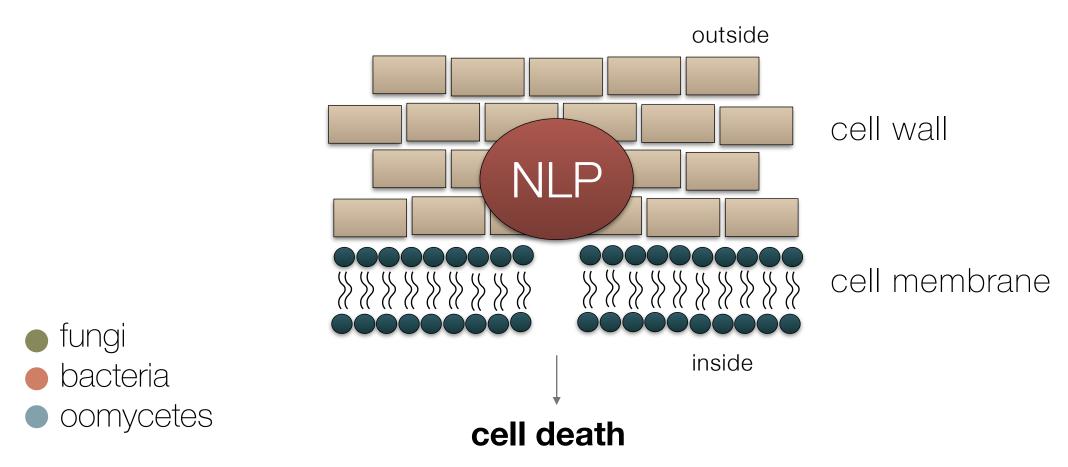

a protein family *leaf necrosis in eudicot plants* secretion plant associated microorganisms dual role activate plant immune response function predicted to form pores in target membranes

NLP toxins
