Shed Light On Your Data.

Ljubljana, 12. 2. 2020

Got messy data?
Machine learning can help.

Pinterest – improved content discovery

Netflix - better movie recommendations

Edgecase – improving conversion rates

Twitter – curated timelines

HubSpot – smarter sales

IBM – decision support in healthcare

**Salesforce** – intelligent CRMs

T-Systems - smarter chatbot

Lek - optimized drug development
Hidria - pressure sensor calibration

Want to join the club?

Ready to start using AI?

A. Buy corporate software that costs thousands of euros in licenses?

B. Train IT team to master machine learning in three years?

C. Hire experts that have over 20 years of experience in machine learning?

What Do We Do?

**We listen**. Learn about your data, problems, and pains.

With you, **we cherry-pick** the AI project with the **biggest gain**.

We deliver the **first results in a month**.

We help you with data organization and do data engineering, modelling, visualization, and quality assessment.

We finish a pilot with a **workshop**, showcasing the solution and **train your employees** to use it.

Then, we sign the **implementation and maintenance** contract.
