**'database'**

***“Digital Natives*** are used to receiving information really fast. They like to parallel process and multi-task. They prefer hypertext. ***Digital Immigrants*** go slowly, step-by-step, one thing at a time.”

## Digital Natives, Digital Immigrants

By Marc Prensky

From *On the Horizon* (MCB University Press, Vol. 9 No. 5, October 2001)  
© 2001 Marc Prensky

**I**t is amazing to me how in all the hoopla and debate these days about the decline of education in the US we ignore the most fundamental of its causes. ***Our students have changed radically. Today’s students are no longer the people our educational system was designed to teach.***

Today’s students have not just changed *incrementally* from those of the past, nor simply changed their slang, clothes, body adornments, or styles, as has happened between generations previously. A really big *discontinuity* has taken place. One might even call it a “singularity” – an event which changes things so fundamentally that there is absolutely no going back. This so-called “singularity” is the arrival and rapid dissemination of digital technology in the last decades of the 20<sup>th</sup> century.

Today’s students – K through college – represent the first generations to grow up with this new technology. They have spent their entire lives surrounded by and using computers, videogames, digital music players, video cams, cell phones, and all the other

— Marc Prensky (2001) ‘Digital Natives, Digital Immigrants’

**Thank you.**
