A Defining Moment Nears for President

Six months into his administration, President Obama is at a pivotal moment. He has pushed through a \$787 billion economic stimulus package, bailed out Wall Street and, on Tuesday, managed to beat the defense industry in the Senate, which voted to kill a high-profile fighter jet program. On Wednesday night Mr. Obama addresses the nation in a prime-time news conference as the public, and lawmakers, are growing skittish over his next big plan, to remake the American health care system.
