

# Driving Innovation with Open Data and Interoperability

Jeanne Holm Evangelist, Data.gov November 14, 2012

# There are three questions to ask about open data

# Why Do Agencies Share Data?

- Meet regulatory compliance
- Better communicate with citizens and stakeholders

# Why Do Countries Share Data?

- Create new economic development
- Kickstart innovation

# DATA.GOV Why Do People Want Open Data?

Releasing and using open data is about empowering people to make better decisions and change their behavior

# Creating a Data Ecosystem

### 1. Gather data

 from many places and give it freely to developers, scientists, and citizens

## 2. Connect the community

 in finding solutions to allow collaboration through social media, events, and platforms

## 3. Provide an infrastructure

built on standards and interoperability

# 4. Encourage technology developers

 to create apps, maps, and visualizations of data that empower people's choices

## 5. Gather more data

and connect more people

"A Strategy for American Innovation" published September 2009

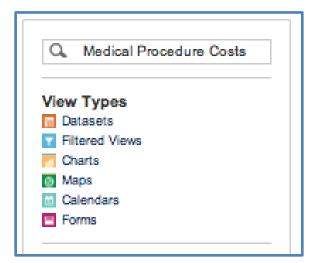

# Data.gov

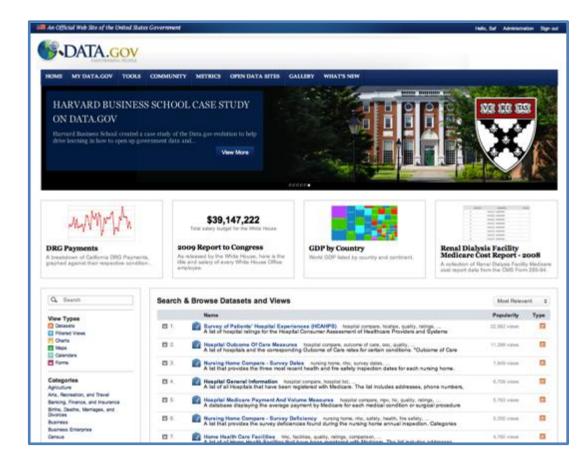

- Provides instant access to ~400,000 datasets in easy to use formats
- Contributions from UN, World Bank, and 172 agencies
- Encourage development of innovative applications
- Drive innovation and knowledge use across the globe

# Easy to Find Data

# The Power of Visualizations

# Powered Through Advanced Technologies

- Provides developers tools and raw data formats to develop new capabilities
- Partnership with
  - W3C: eGov Interest Group + activities, standards, and recommendations
  - RPI for research in semantic web and open linked data
- Data hosted in the cloud
- Open source platform
- Builds on ontologies developed in specific areas

# Students and Learning

 Universities are using Data.gov in the classroom as a learning guide and to have students develop apps from government data

http://www.data.gov/story/datagov-in-the-classroom

 Elsevier's SciVerse project called US Government Dataset Search creates an index of references and use of government data in scientific publications <a href="http://www.data.gov/communities/">http://www.data.gov/communities/</a> /node/116/view/215

# Data.gov for the Economy

- NOAA's data helped build weather-related business
- When the Department of Defense released satellite data...private industry created affordable GPS devices!
- Together these open data services empower \$100B data-driven industries

#### An Official Web Site of the United States Government Thursday September 29, 2011 | Text: A\*A\*A | @ Store DATA.GOV / ENERGY BETA A Wy account | 42 Logout Logged in as: Jeanne Holm WELCOME TO SPECIAL FEATURES NTA ENERGY.DATA.GOV AMERICA'S HOME where data and insight are combined to facilitate public discussion and awareness of our Nation's energy activities. # **Creating Community**

- Communities are public-facing spaces that present data, information, and subject matter knowledge about a single topic from many organizations in one place
  - The topics for communities can be chosen based on priorities from the public, departments based on their mission, or issues of national importance

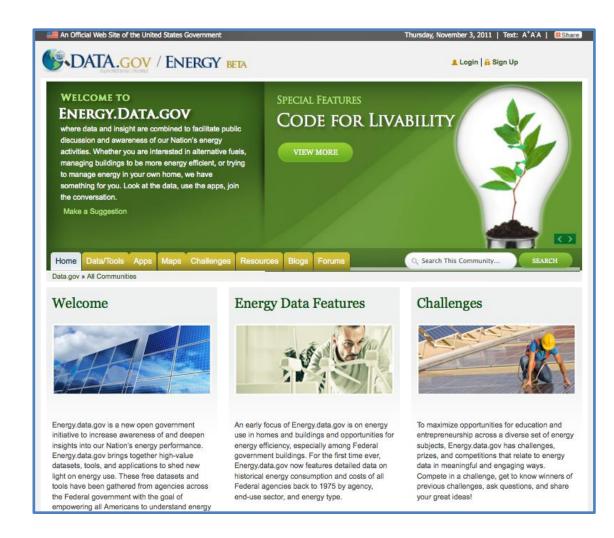

# Creating a Shared Vision

- These questions help to guide early discussions
  - 1. Vision: What will the community connection and collaboration look like in the future?
  - Leaders: Who will help to lead the community?
  - 3. Participants: Who will participate?
  - 4. Outcome: What are the expected outcomes, metrics, and measurements that will show success? How will this community work to improve the lives of citizens?
  - 5. Functionality: What types of activities will be conducted on the site (forums, blogs, wikis, ranking, rating, challenges, or apps)?
  - 6. Content: What content should be displayed
  - 7. Interactivity: What ways will the community interact with the leaders, with each other, and with the public?

# **Energy Drives Innovation**

 Energy.Data.gov connects innovators, industry, academia, and government at federal, state, and local levels

 Energy.Data.gov works with groups and challenges across the nation to innovate around federal data

# Challenges Spark Ideas

#### **CHALLENGES**

Want to get involved in helping to solve an energy problem that you see in your home, community, or country? Join in on one of our challenges. Challenges range from brainstorming ideas to creating applications to proposing research. Not ready to jump in? Then come and see how others have responded and look at the winners of previous challenges.

#### Open Challenges

#### Code for Livability

The Partnership for Sustainable Communities is hosting a code-a-thon to brings together citizens, developers, and government personnel to work on solutions that bring

sustainability to the forefront of peoples' everyday lives. Join us on January 21-22, 2011 to make a difference!

#### 2011 ENERGY STAR National Building Competition: Battle of the Buildings

It's an energy savings battle as 245 buildings compete to see who can be the most efficient.

#### Resources

- · CBECS · CEUS
- EnergyIQ
- · Portfolio Manager
- . NREL Renewable Energy Certificate and Green Power

#### America's Home Energy **Education Challenge** Participate in three great ways:

Have your class or school join in the Home Energy Award by saving energy and win prizes for

- · Feeling artistic? Design a conservation plan and poster.
- . Shall we play a game? Compete in the Energy Fitness Award with online games, quizzes and activities to earn prizes for you and your school.

#### Resources:

- EnergySmart
- EnergySavers.gov

#### Build your own challenge for energy efficiency

You can use this platform and process to employ ENERGY STAR tools and resources in your energy improvement

#### Apps for the Environment

EPA challenges you to find new ways to combine and deliver environmental data in a new app. In the Apps for the Environment challenge, you

have free reign to make an app that uses EPA data, addresses one of Administrator Lisa Jackson's Seven Priorities, and is useful to communities or individuals. EPA encourages you to use other environmental, energy, and health data too. The winners will be honored at a recognition event in Washington, D.C. this fall and the winning apps will be publicized on EPA's website. EPA is counting on you to come up with exciting and useful new apps!

#### Rooftop Solar Challenge Be part of a national effort to

make clean solar electricity cost-competitive for your community.

efforts.

Special Features The Green Button

# **US Digital Strategy**

- Ensure that as the government adjusts to this new digital world, we seize the opportunity to procure and manage devices, applications, and data in smart, secure and affordable ways
- Unlock the power of government data to spur innovation across our Nation and improve the quality of services for the An whiteHouse.gov/digitalgov people

# US Open Government Action Plan

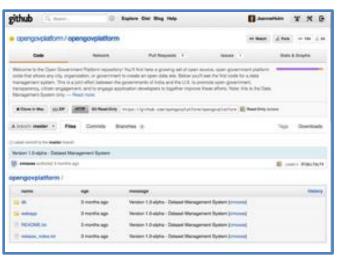

- On 20 September 2011, President Obama announced at the UN General Assembly...
  - Contribute Data.gov as a platform (Government of India and the U.S.)
  - Foster communities on Data.gov
  - Health, energy, and law plus new communities in education, research and development, and public safety
- In September 2012, President Obama reported these actions delivered

# DATA.GOV Open Government Platform (OGPL)

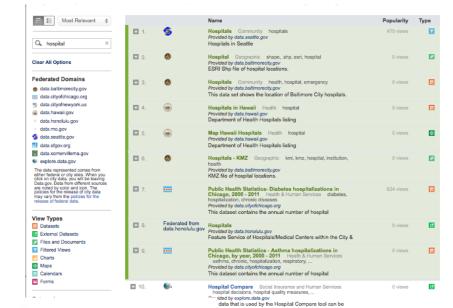

- Open source co-developed by India's National Informatics Centre and US Data.gov Team
- Data.gov is migrating to OGPL in 2012
- Coordinating with open data providers, platforms, and communities like W3C, World Bank, CKAN, and open source developers worldwide
- Public commits and tracker on Github
- Public mailing list for discussion
- Join the community!
  - https://github.com/opengovtplatform
  - http://www.opengovplatform.org

# US Open Data at Cities, Counties,

## and States

1 2 3 4 5 6 7 8 9 ...

# Data.gov Capabilities

### Present

- Dataset Management
  - Workflow engine and metadata editor
  - Extended Dublin Core
- Search
  - Keyword and filtering by basic metadata facets
  - 6.7 billion triples
- Geo
  - Search, harvesting, and map visualizations via www.geoplatform.gov
- Vocab.Data.gov
  - Vocabulary and schema engine for linked data
  - URIs for all health data

### Future

- OGPL
  - Open source platform built on Drupal +
- API key registry
  - API key authorization
  - Templates and standards
  - Application statistics
- Enhanced search
  - Federated catalogs across agencies, cities, regions, and topics
- Vocab.Data.gov
  - Federated ontologies
  - URIs for all data
- Standards driven
  - ADMS-based metadata

# Partnerships for Better Data

- Ontologies and schema adoption and augmentation with
  - Schema.org, IEEE, ISO, AGU, and others
  - Crowdsourced folksonomies
- RPI and Professor Jim Hendler
  - Lead for semantic web for Data.gov

# International Partnerships for Better Data

- W3C leadership (w3c.org)
  - Government Linked Data Working Group

- eGovernment Interest Group (join for free!)
- Government of India
  - Shared leadership in the Open Government Platform
- CKAN
  - Co-developing components of the Open Government Platform
  - Open Knowledge Foundation

## 5 Star Data

# Helping Others Through a Disaster

# **DATA.GOV** Restore the Gulf: Deepwater Horizon

# Japanese tsunami, earthquake, and radiation monitoring

Data and apps from EPA via Data.gov

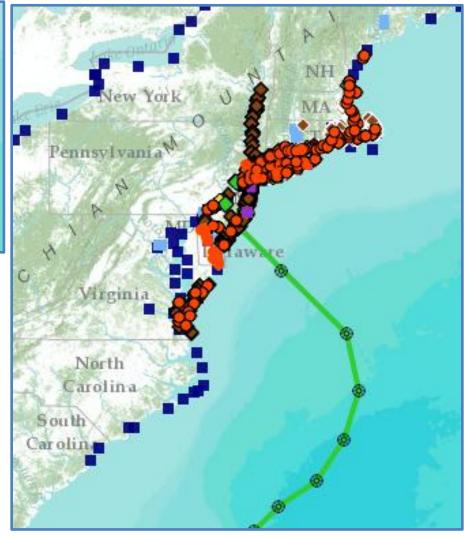

# **Hurricane Sandy**

Early warnings save lives

Data from USGS via Data.gov

# Transparency in Government Spending

# Recovery.gov

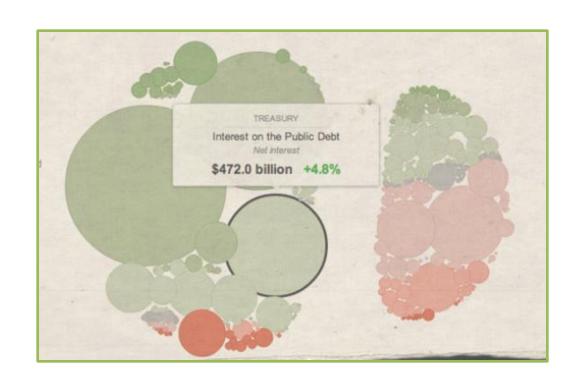

REPORT FRAUD, WASTE & ABUSE

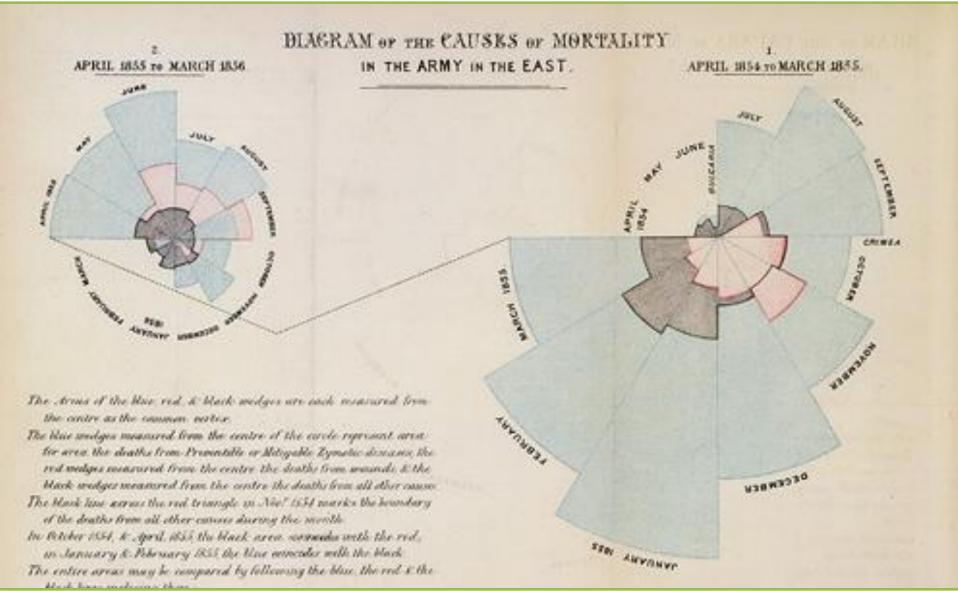

#### Visualizations to help understand data

- Great visuals can change the world (Florence Nightingale's visualizations of infection)
- We connect large numbers to personal experience
- www.visualbudget.org

## Making the Federal Budget Easy to Understand: Visual Budget

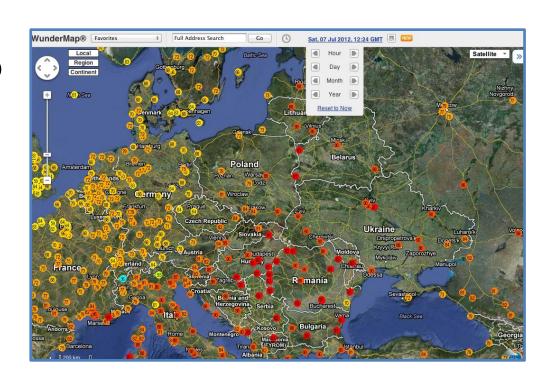

#### Creating a Multi-Billion Dollar Industry

#### Weather Underground

- Severe weather
   warnings allow people to
   react appropriately to
   threats
- Internationalization:
   MeteoAlarm (EUMetNet)
- Need shared models and standards
- www.wunderground.com

#### **Crowdsourcing Data**

#### **USAID Food Security Challenge**

- Kat Townsend at USAID had a great idea
  - Develop apps to increase food security
  - "Crowdsourcing the questions and crowdsourcing the solutions"
  - Three Ideation Jams → Code-athon and a Data Palooza
  - 10,000 data entries corrected with 145 volunteers in 16 hours with 85% accuracy
  - http://idea.usaid.gov/g8

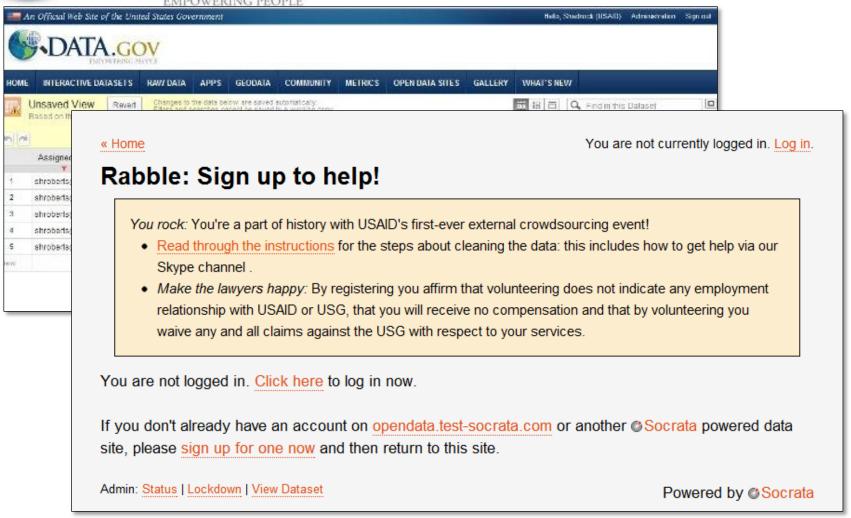

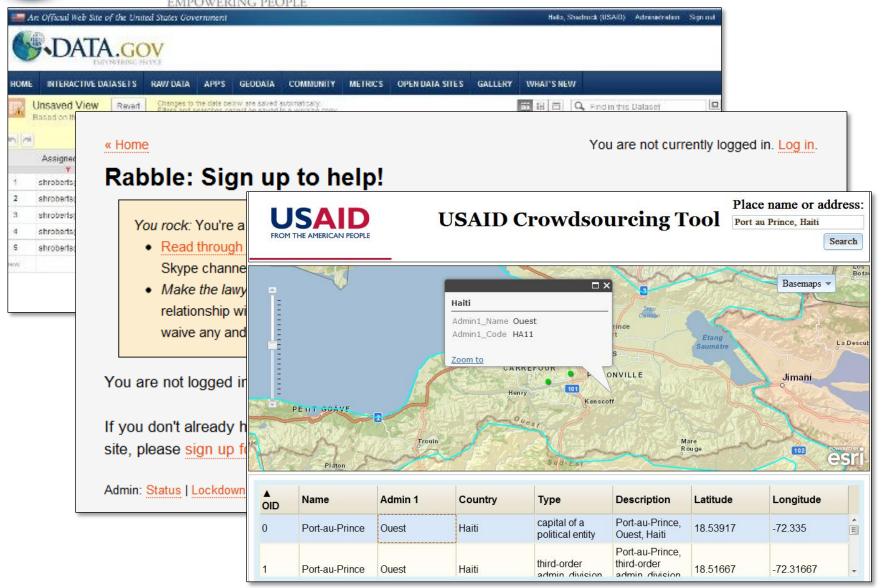

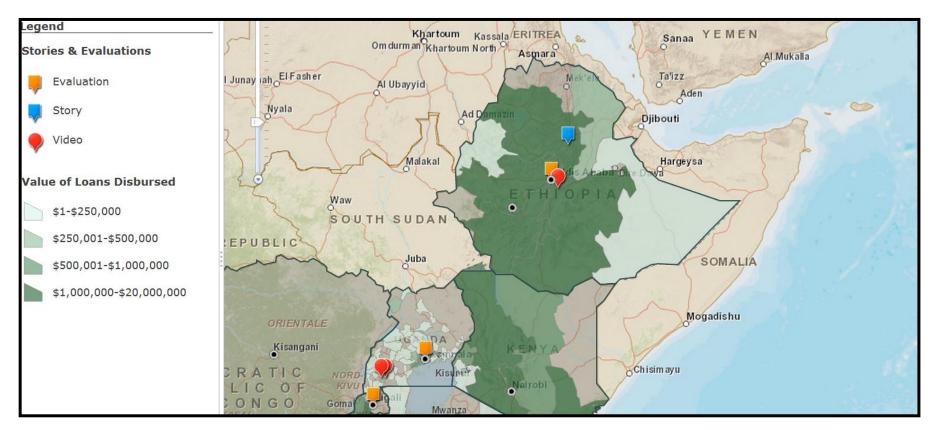

http://www.usaid.gov/results-and-data/progress-data/data/dca

## Looking for work or funding?

#### **Growth in Big Data Jobs**

#### "big data" Job Trends

## Not Sure Where to Get Started...

#### Challenge.Gov— Investing in Innovation

- Stimulate private sector investment
- Improve skills of the participants
- Hundreds of challenges
- Millions of dollars
- Provided by GSA

#### Race to the Rooftops

- Make it faster, easier, and cheaper to install solar panels on home throughout the nation
- \$10M in prizes over two years
- Department of Energy

U.S. Department of Energy

#### **Motorcoach Safety**

- 4,000 people are killed and >100,000 people are injured each year in crashes with large trucks and buses
- Data from U.S.
   Department of
   Transportation's Federal
   Motor Carrier Safety
   Administration
- Challenge focuses on student entries

#### Take a breath...

#### **Asthmapolis**

## Have you ever saved a life?

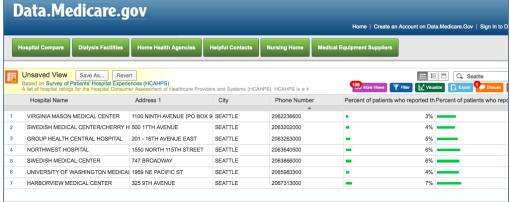

## What if you could help save 7,000,000 lives?

#### .all Carrier 🤝 1:56 PM Triage **Call 911** Find Medical Treatment Find A Doctor Look up your Symptoms Research Diseases Learn about Procedures Your Health Record About and Help **Procedures** Providers

#### iTriage

#### Moving Open Data Forward

#### The Path Ahead

- Bring data up and out of government to the public \*
- Make data accessible and linked ★★★★★
- Create communities to understand and apply data
- Connect and collaborate with small businesses, industry, and academia to drive innovation
- Continue to develop OGPL with community development
- Share with others to understand global issues

We need to securely architect our systems for interoperability and openness from conception.
