

Leadership for innovation ecosystems

Ethical, social responsible, creative
people co-create and contribute to
the collective intelligence.

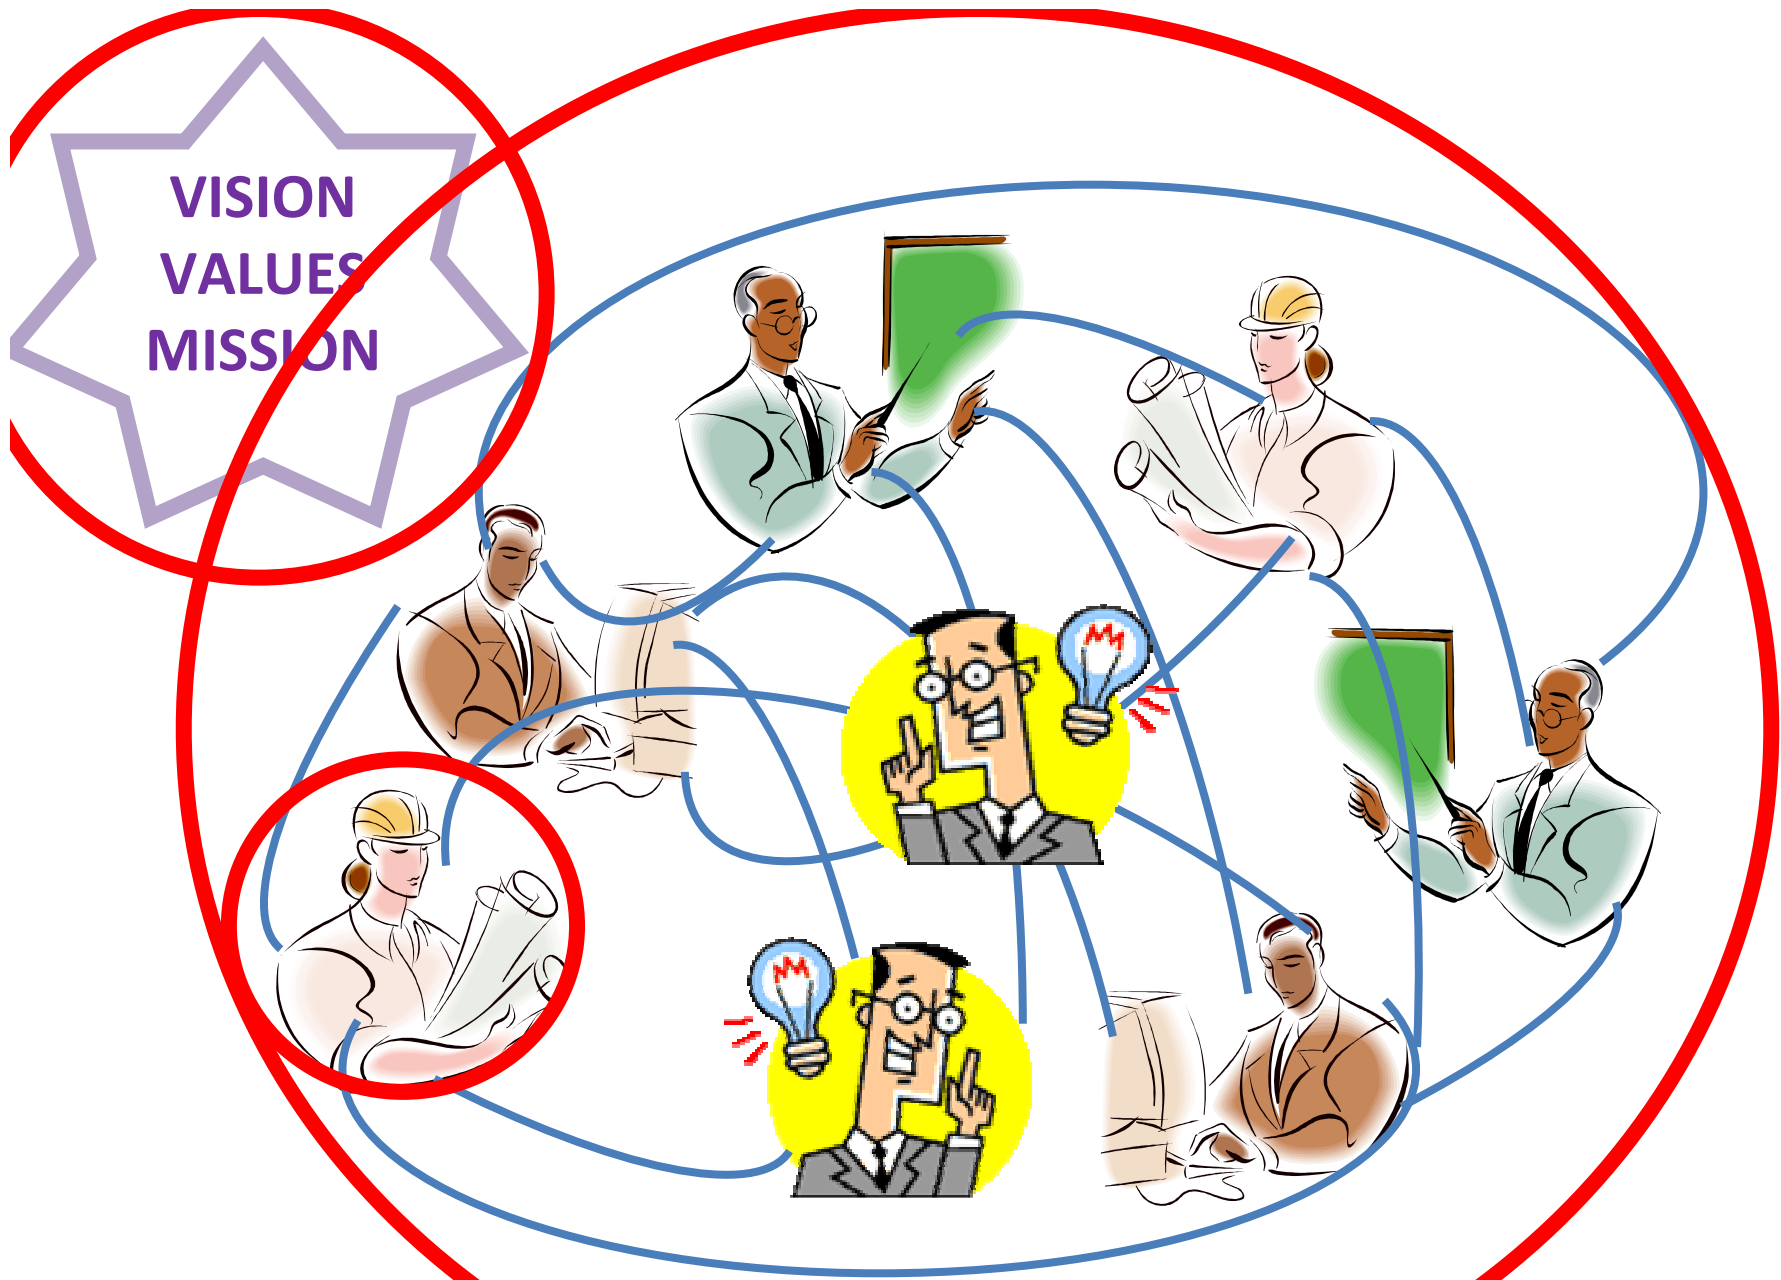

New times ask for new approach

- The need to generate new ways of **cooperation and co-creation**;
- to develop people's awareness and facilitate **systems thinking and ethics**;
- evolution of organisation to support to raise the **collective intelligence**;
- **each individual can be a leader.**

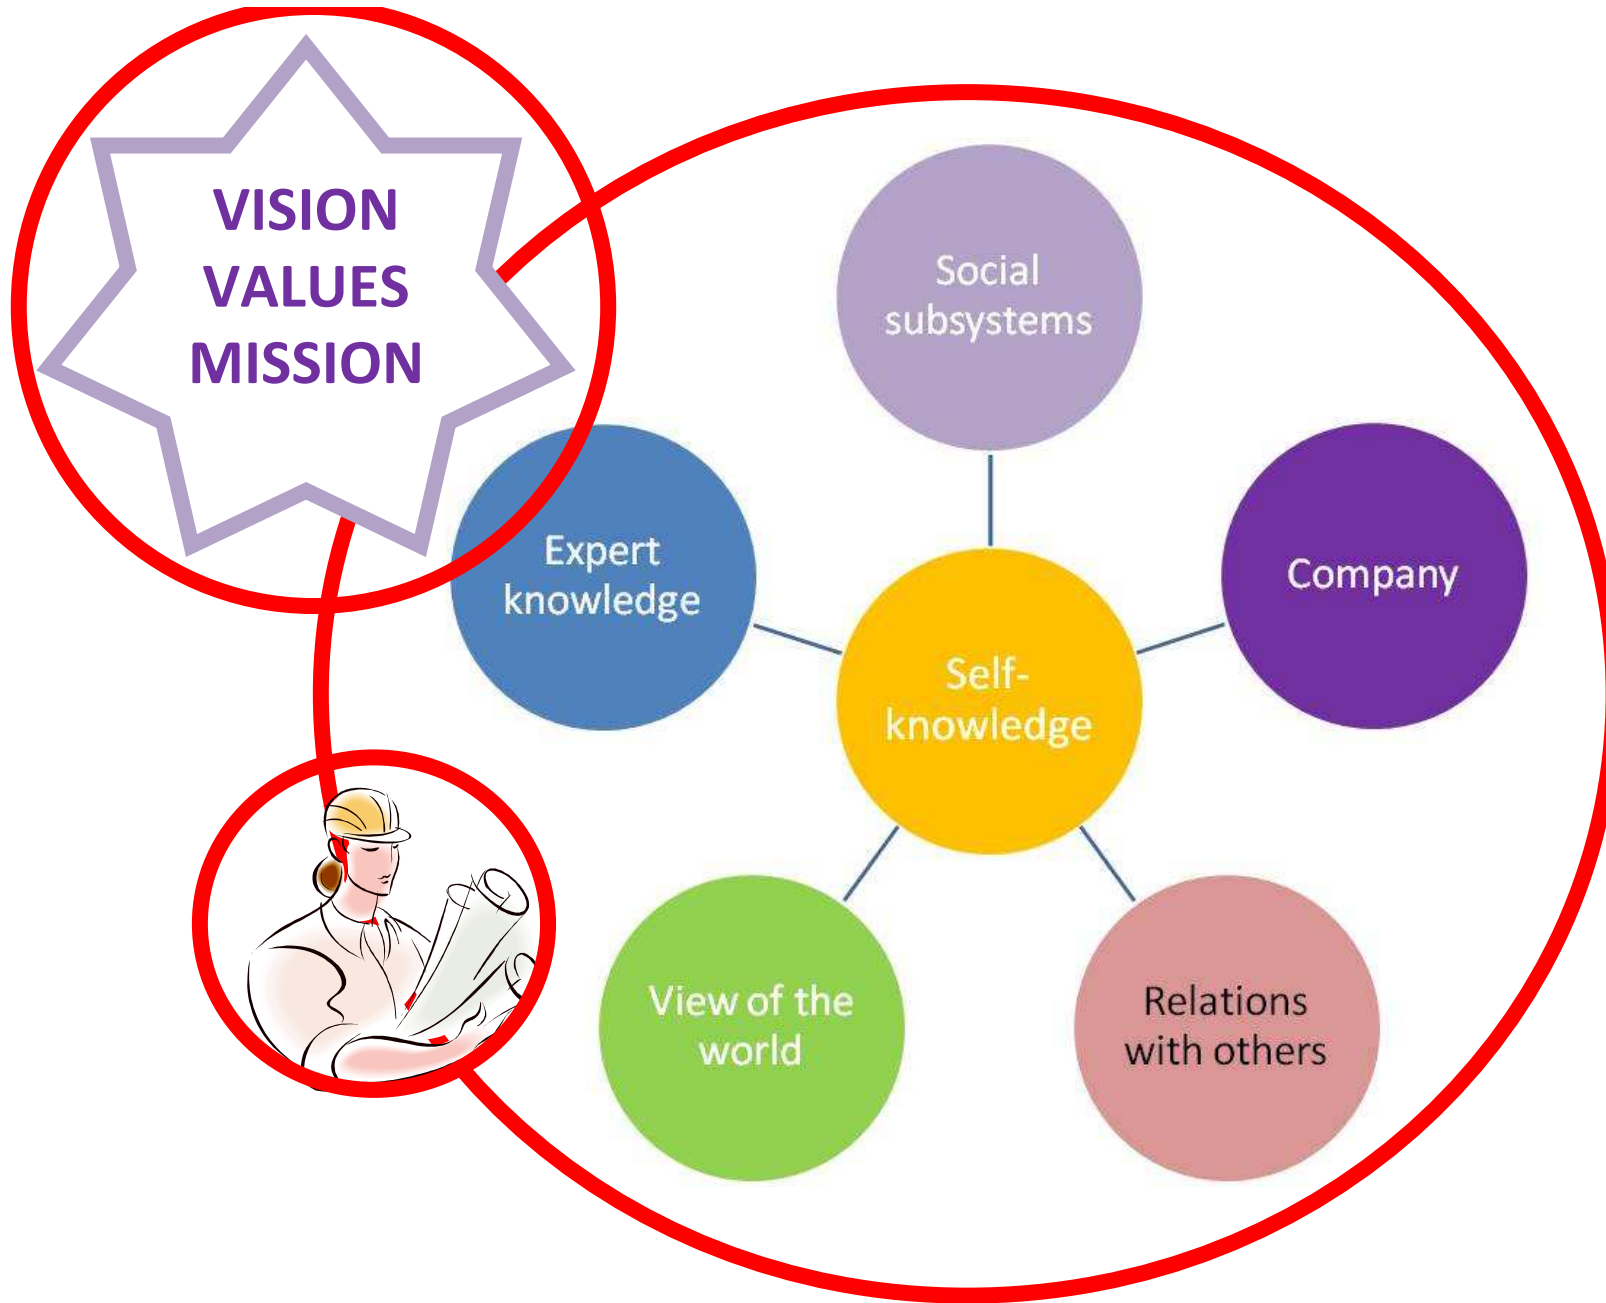

Molecular structure

Open, learning, networked, experimental, adaptive.

From hierarchical structures to distributed leadership.

Each individual as a leader – stand for VVM and connected.
