What is a Solvonauts?

A different kind of OER search

How?

Open Source

Open Resources

Open Data

OER
has
broken
free

Where would you host OER now?

OER
has
gotten
lost

How would you find OER now?

OER doesn't matter

Metadata doesn't scale

So?

Can harvest from many places

Can change metadata automatically

Internationalised

Could tie into crowdsourcing

Has services which can be built on

Build your own

One main OER search engine

Multiple OER search engines

Language specific OER search engines

Nation specific OER search engines

University specific OER search engines

Individual OER search engines

MOOCs

Many

Online

OER

Collections

OER everywhere

find it where people place it

Not just storage

also broadcast and integration

Twitter

RSS

Moodle

WordPress

Not finished, not beta

basic

expandable

usable

improvable

The 5R search engine

Retain

Reuse

Remix

Revise

Redistribute

Shouldn't an OER search engine be an OER?

Yes
