OCWC
GLOBAL
CONFERENCE

Objectives

- Participants are asked to identify the most important issues in relation to starting with or continuing with OE projects at their institutions
- Make a list of allies, advocates at their university that can form a group to advance Open Education: staff, faculty, administrators

“Open education is a collective term that refers to educational organizations that seek to **eliminate barriers to entry**. Such institutions, for example, would not have academic admission requirements. Such programs are commonly distance learning programs like e-learning, mooc and opencourseware, but not necessarily.”

Open Learning Services (OLS)

Complementary to OER, *free or to be paid,*

and including a variety of

online and *virtual facilities* for:

tutoring, advice, meetings, communities, teamwork, presentations, testing, examination, consulting sources, internet navigation, etcetera ...

Open to Learners' Needs (OLN)

Learners expect affordable, 'do-able',
good quality, interesting, beneficial education,
but also the 'classical' openness (OUs):
freedom of time / pace / place,
open entry, open programming,
and provisions for lifelong learning,
credentialing, smooth switching between
formal and informal learning,
etcetera ...

Open to Employability & Capabilities development (OEC)

‘Society’ expects education to suit
the changing society and labour market,
the decisive role of knowledge and innovation,
and the influence of globalization,
but also to offer scope for new skills,
critical thinking, ethics, creativity,
personal growth, and citizenship
