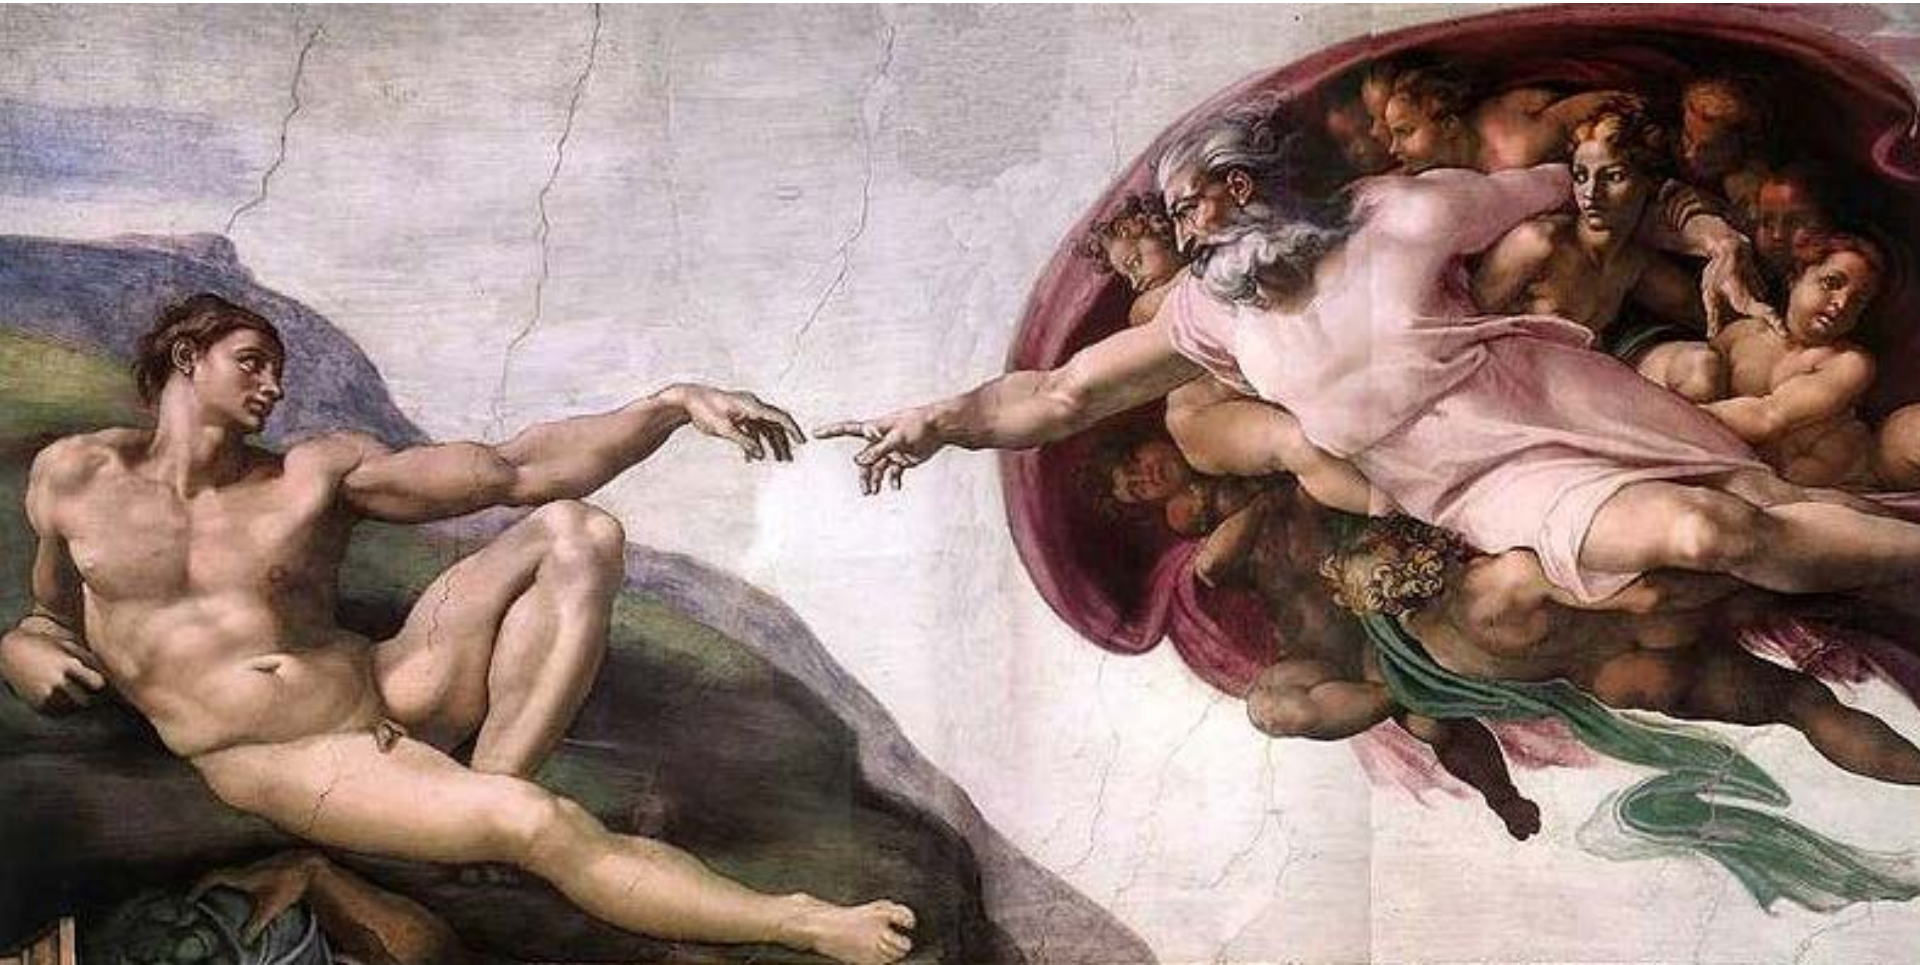
KREACIONIZEM



- Kreacionizem je (versko) prepričanje, da je življenje na Zemlji in v vesolju stvaritev (kreacija) nadnaravnega bitja

- Kreacionizem je doktrina, ki izvor vseh stvari pripisuje božji stvaritvi (kreaciji), ne pa evoluciji

Evolucija

- V biologiji je evolucija **sprememba** v značilnostih populacije organizmov v času (zaradi več mehanizmov in procesov)

- Evolucija je **sprememba** v podedovanih značilnostih bioloških populacij v zaporedju generacij. Proces povečuje raznovrstnost na vseh nivojih biološke organizacije (DNK, beljakovine, osebki, vrste itd.)

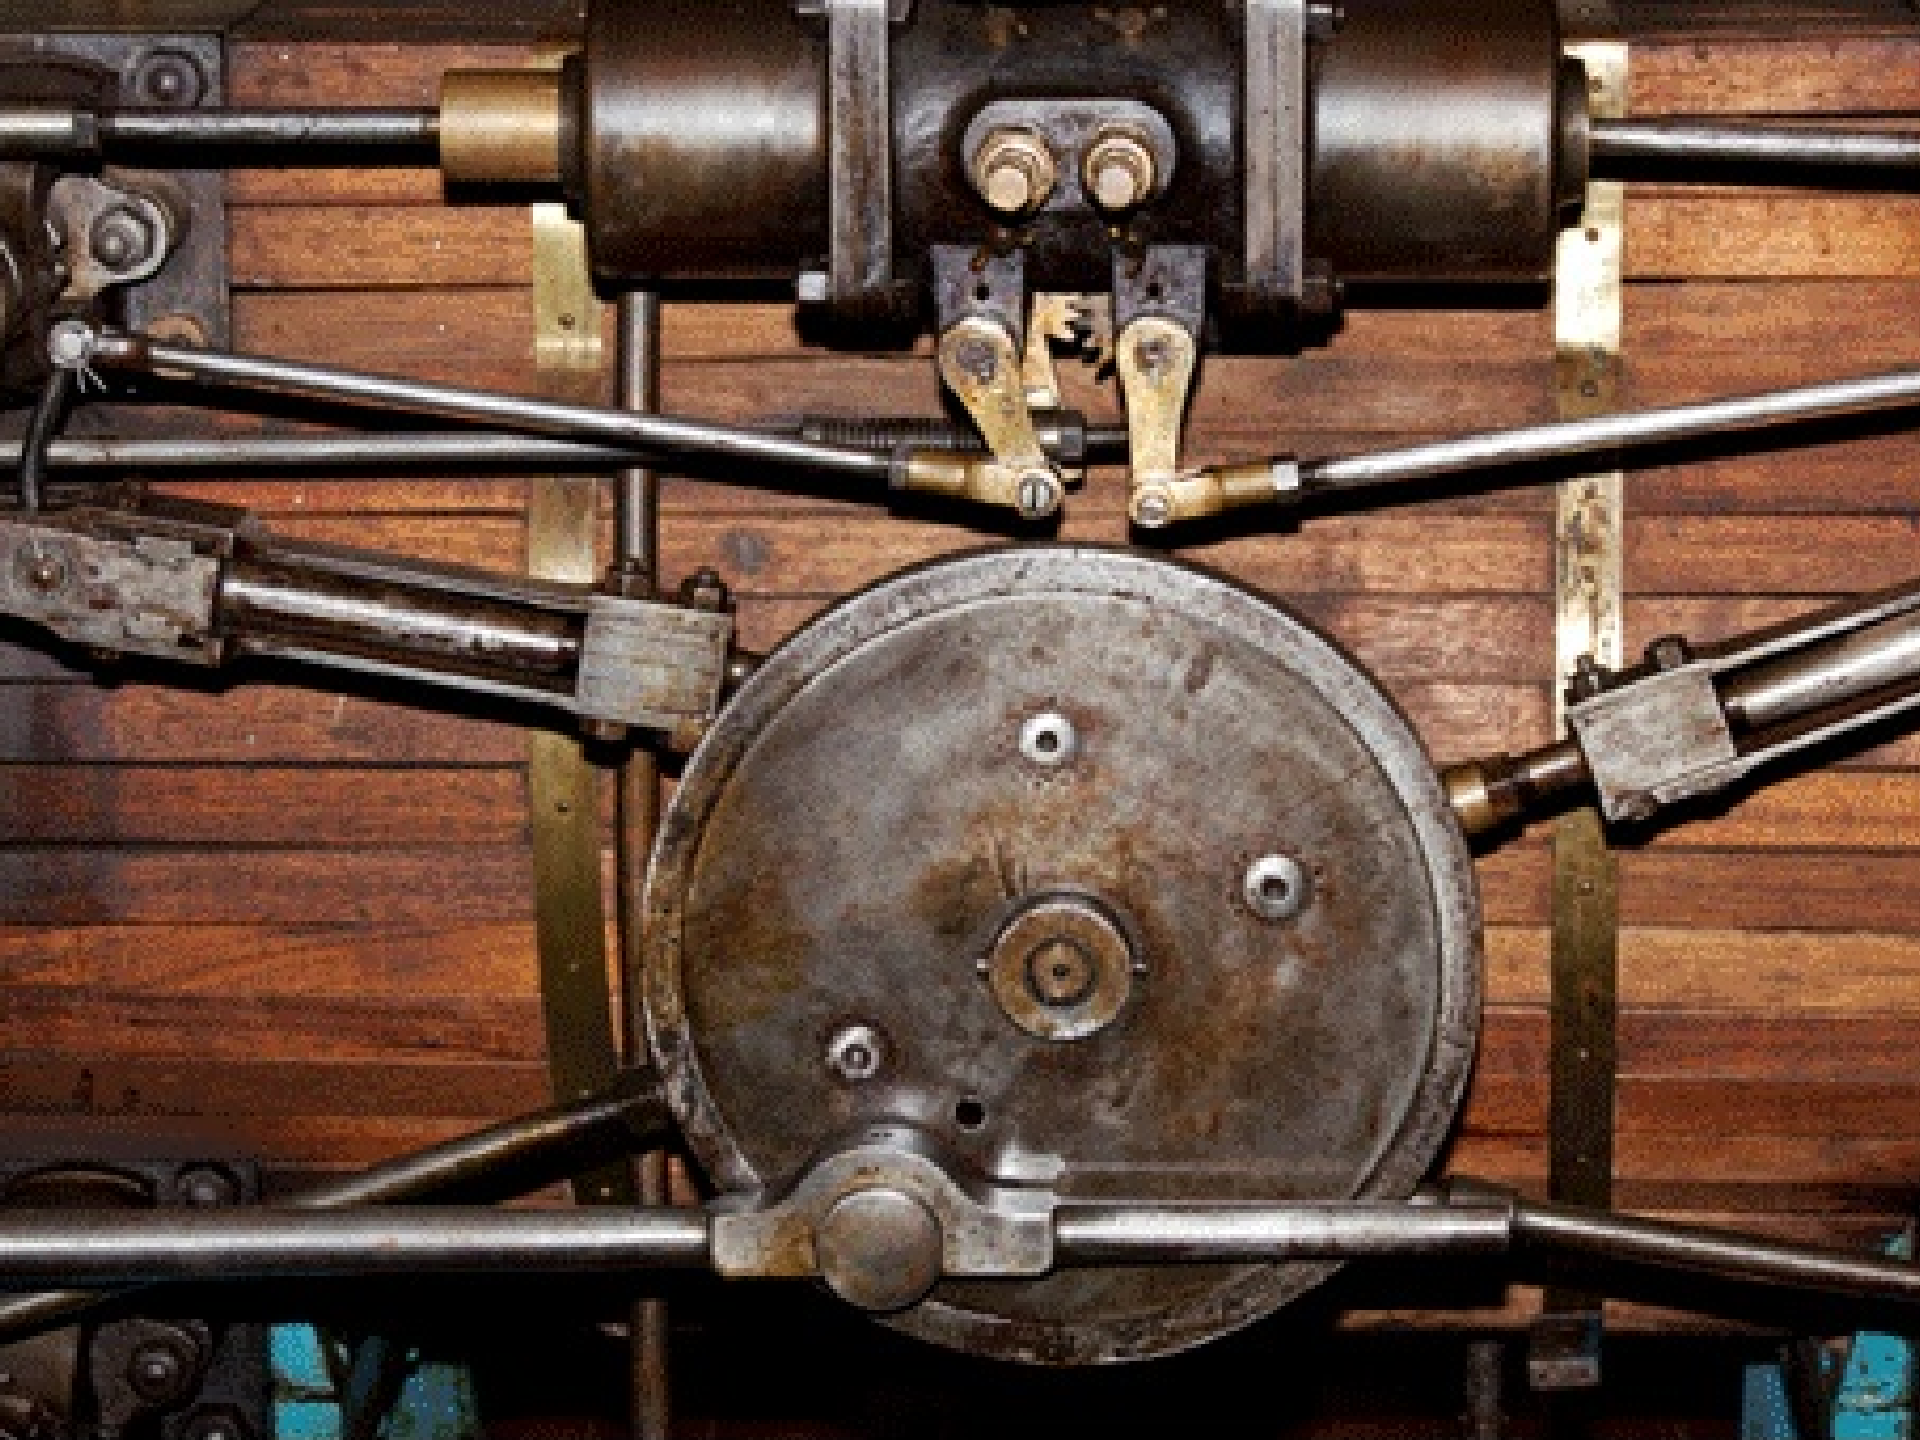
DEBUNKING RELIGION OF CHANCE

The debate boils down essentially to one issue — chance vs. design. The human race originated either by design or strictly by chance; no more, no less. Chance assumes no supreme being. Design requires one. — JOHN C. OWNBY

RAZGALJENJE RELIGIJE NAKLJUČJA

Razprava se v bistvu osredotoči na eno samo vprašanje – naključje ali stvaritev. Človeška *rasa* je bila ustvarjena, ali pa je nastala po **naključju**: nič več, nič manj. Naključje ne potrebuje nadnaravnega bitja. Stvaritev je mogoča le z njim.



"We take the side of science in spite of the patent absurdity of some of its constructs, in spite of its failure to fulfill many of its extravagant promises of health and life, in spite of the tolerance of the scientific community for unsubstantiated just-so stories, because we have a prior commitment, a commitment to materialism. It is not that the methods and institutions of science somehow compel us to accept a material explanation of the phenomenal world, but, on the contrary, that we are forced by our a priori adherence to material causes to create an apparatus of investigation and a set of concepts that produce material explanations, no matter how counter-intuitive, no matter how mystifying to the uninitiated. Moreover, that materialism is an absolute, for we cannot allow a Divine Foot in the door."

(Richard Lewontin, *Billions and billions of demons, The New York Review, January 9, 1997, p. 31)*

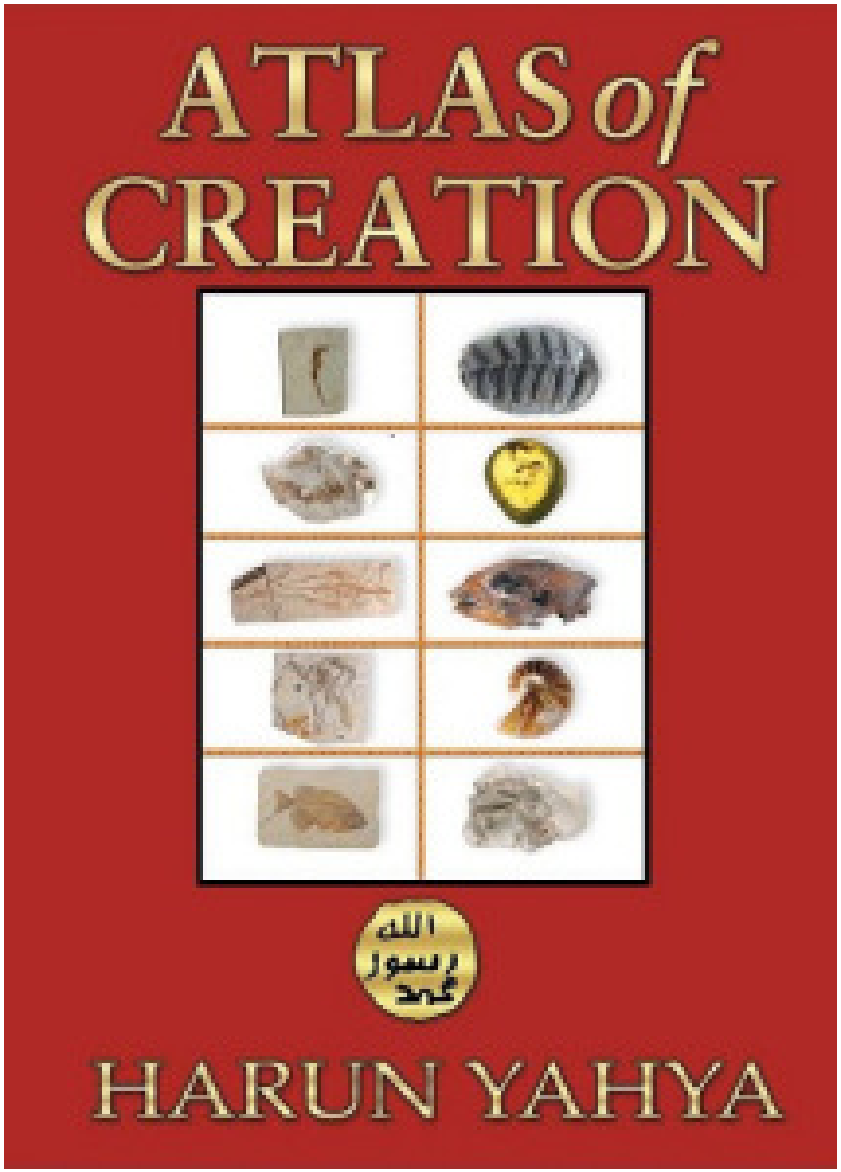
21 Facts that Evolutionists CAN'T ANSWER!

1:16 / 4:09

Worth1000.com

Harun Yahya



The teeth in the jackal fossil shown to the side are perfectly clear and show that jackals have come down unchanged to the present day. The fossil in the picture reveals that, just like tigers, foxes, lions, rhinoceroses and all other life forms, jackals have never changed.

Jackal Skull

Period: Eocene

Age: 51 million years

Region: Gao Xiong, Taiwan

Not one single fossil showing that life forms share a common ancestor has ever been found. There is no evidence in the fossil record that life forms are in a constant state of change. So why are Darwinists so insistent on their theory? Why do they insist on saying that life forms evolve, when there is so much proof that Allah creates them? The reason is entirely ideological. Defending the theory of evolution is vitally important for materialistic and atheistic ideologies.

Darwinists can persist with the theory of evolution all they like, but the fossil record will continue to demolish evolution with new evidence. The 51-million-year-old fossil jackal in the picture is one example of that fact.

Details such as the fossil's dental structure reveal that this life form was the same 82 million years ago as it is today.

Striped Jackal Skull

Period: Cretaceous

Age: 82 million years

Region: Xi Jiang, China

An 82-million-year-old striped jackal skull is just one of the living things that has left remains behind to the present day. This fossil show that fully formed jackals, with all their anatomical features just as jackals of today were also living on Earth 82 million years ago. This and countless other examples tell Darwinists that when we look at the fossil skulls of jackals, monkeys, other life forms or even of now extinct human races that once lived in the past, we see that none of these have ever changed. Not a single transitional form to show that any one of these has changed has ever been found. This means that living things never evolved, and that each one is the creation of Almighty Allah.

SCIENTIFIC
CREATIONISM

- **Znanstveni kreacionizem** se razlikuje od splošnega (*general*) kreacionizma. Slednji zastopa prepričanje, da je življenje in vesolje ustvaril Bog. Znanstveni kreacionizem verjame, da je to mogoče dokazati z .... znanstvenimi metodami. Je torej oblika kreacionizma, ki ni več religiozno prepričanje (*faith*) ampak si ... prizadeva, da bi bil sprejet kot znanstvena dejavnost.

- Kreacionistični model je najmanj enako znanstven, kot evolucijski model, in je najmanj enako ne-religiozen kot pa je evolucijski model

... ni treba prav vsakega primera stvaritve, ki ga vidimo v naravi, pripisati Bogu. Kot kristjani seveda verjamemo v hierarhijo angelov – ni tako da bi bil na eni strani materialni svet, na drugi pa Bog. Delujejo lahko različne hierarhije inteligentnih bitij. Bog lahko deluje skozi **izpeljano inteligenco** – proces, ki uresničuje božjo voljo, čeprav ne v popolni obliki.
