# Connect Yourself.

“Making sense of data is beautiful, fun, and unbelievably addictive, I will always be digging, playing, and creating with data. Not so long ago, my question was ‘now what’? Many years of academic work did not provide me with a satisfying answer and I would soon discover that impact – real, relevant impact in peoples lives was what I was looking for.”

Phil Martin, Data Scientist at  
SumAll.org

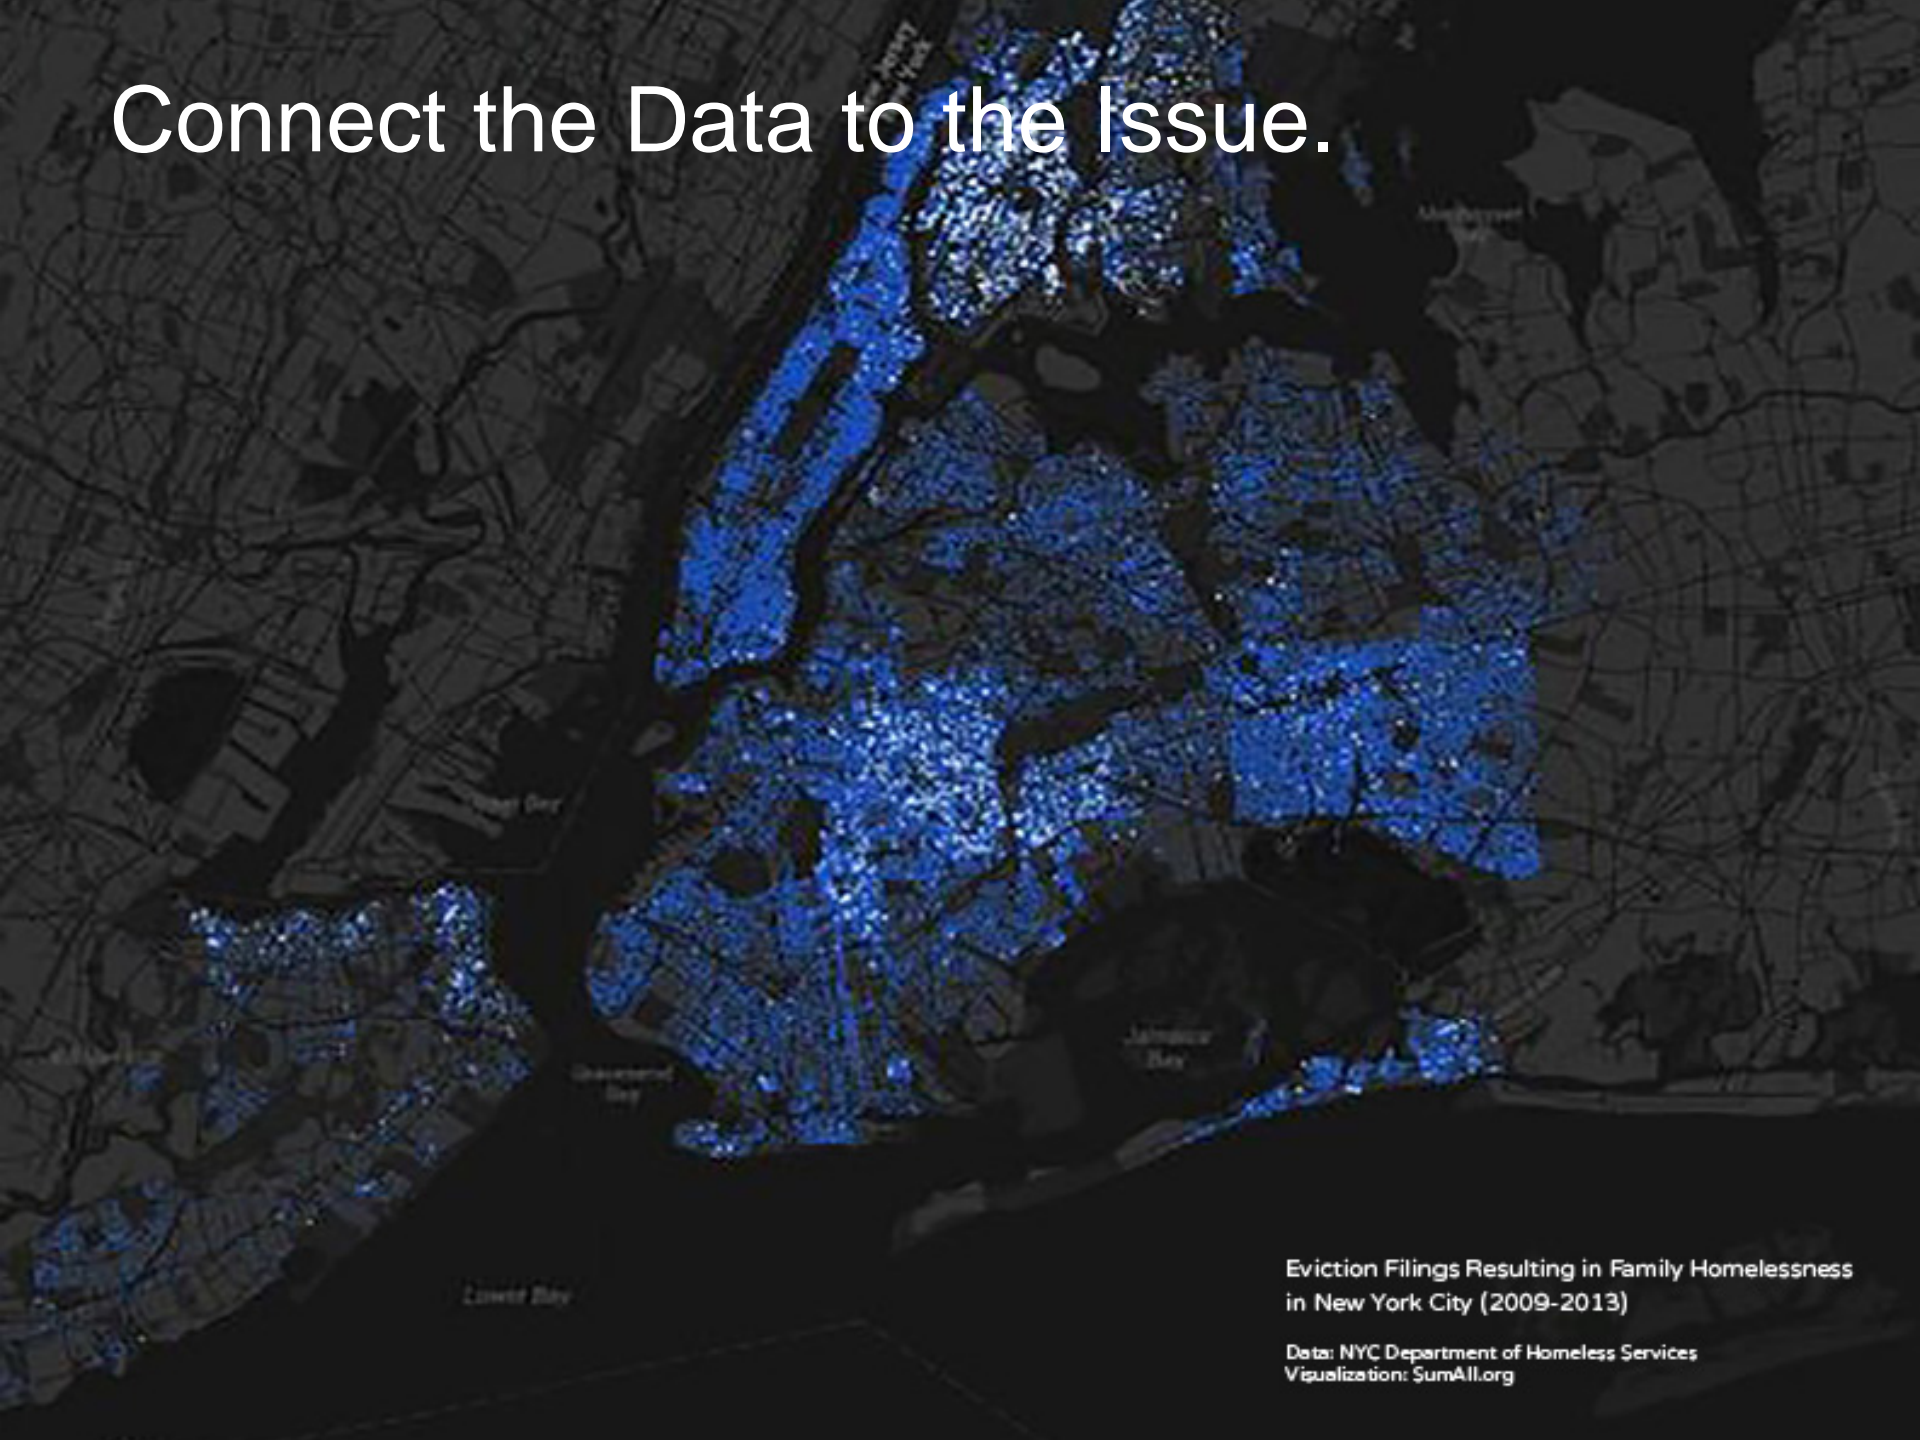

# Data helps us understand Social Risk

# Connect the Data to the Issue.

Eviction Filings Resulting in Family Homelessness  
in New York City (2009-2013)

Data: NYC Department of Homeless Services
